Sarafloxacin-d₈ hydrochloride trihydrate

Cat. No.:	HY-B0343BS
Molecular Formula:	C ₂₀ H ₁₆ D ₈ ClF ₂ N ₃ O ₆
Molecular Weight:	483.92
Target:	Bacterial
Pathway:	Anti-infection
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

BIOLOGICAL ACTIVITY

Description	Sarafloxacin-d ₈ (hydrochloride trihydrate) is the deuterium labeled Sarafloxacin hydrochloride trihydrate. Sarafloxacin hydrochloride trihydrate is a quinolone antibiotic compound[1][2].
In Vitro	Stable heavy isotopes of hydrogen, carbon, and other elements have been incorporated into drug molecules, largely as tracers for quantitation during the drug development process. Deuteration has gained attention because of its potential to affect the pharmacokinetic and metabolic profiles of drugs ^[1] . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
