## Chlorpromazine-d<sub>6</sub> hydrochloride

|                    |                                                                                                                                                    |
|--------------------|----------------------------------------------------------------------------------------------------------------------------------------------------|
| Cat. No.:          | HY-B0407AS                                                                                                                                         |
| CAS No.:           | 1228182-46-4                                                                                                                                       |
| Molecular Formula: | C <sub>17</sub> H <sub>14</sub> D <sub>6</sub> Cl <sub>2</sub> N <sub>2</sub> S                                                                    |
| Molecular Weight:  | 361.36                                                                                                                                             |
| Target:            | Dopamine Receptor; 5-HT Receptor; Sodium Channel; Potassium Channel                                                                                |
| Pathway:           | GPCR/G Protein; Neuronal Signaling; Membrane Transporter/Ion Channel                                                                               |
| Storage:           | 4°C, sealed storage, away from moisture and light<br>* In solvent : -80°C, 6 months; -20°C, 1 month (sealed storage, away from moisture and light) |

### BIOLOGICAL ACTIVITY

#### Description

Chlorpromazine-d<sub>6</sub> (hydrochloride) is the deuterium labeled Chlorpromazine. Chlorpromazine is an inhibitor of dopamine receptor, 5-HT receptor, potassium channel, sodium channel.

**Caution: Product has not been fully validated for medical applications. For research use only.**
