Cetrimonium-d33 bromide

Cat. No.:	HY-B1260S1
CAS No.:	347841-42-3
Molecular Formula:	C ₁₉ H ₉ D ₃₃ BrN
Molecular Weight:	397.65
Target:	Isotope-Labeled Compounds
Pathway:	Others
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

BIOLOGICAL ACTIVITY

Description	Cetrimonium-d ₃₃ (bromide) is the deuterium labeled Cetrimonium bromide[1]. Cetrimonium bromide (CTAB) is an amine based cationic quaternary surfactant, is one of the components of the topical antiseptic Cetrimide.
In Vitro	Stable heavy isotopes of hydrogen, carbon, and other elements have been incorporated into drug molecules, largely as tracers for quantitation during the drug development process. Deuteration has gained attention because of its potential to affect the pharmacokinetic and metabolic profiles of drugs ^[1] . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
