## Bamethan-d<sub>9</sub> acetate

|                    |                                                                                           |
|--------------------|-------------------------------------------------------------------------------------------|
| Cat. No.:          | HY-B1538S                                                                                 |
| Molecular Formula: | C <sub>14</sub> H <sub>14</sub> D <sub>9</sub> NO <sub>4</sub>                            |
| Molecular Weight:  | 278.39                                                                                    |
| Target:            | Isotope-Labeled Compounds                                                                 |
| Pathway:           | Others                                                                                    |
| Storage:           | Please store the product under the recommended conditions in the Certificate of Analysis. |

### BIOLOGICAL ACTIVITY

#### Description

Bamethan-d<sub>9</sub> (DL-Bamethane-d<sub>9</sub>) acetate is the deuterium labeled Bamethan. Bamethan is a vasodilator agent<sup>[1]</sup>.
