Ditiocarb-d₁₀ sodium

Cat. No.:	HY-B1637S
CAS No.:	1261395-23-6
Molecular Formula:	C ₅ D ₁₀ NNaS ₂
Molecular Weight:	181.32
Target:	HIV
Pathway:	Anti-infection
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

BIOLOGICAL ACTIVITY

Description	Ditiocarb-d ₁₀ (sodium) is the deuterium labeled Ditiocarb sodium[1]. Ditiocarb sodium (Sodium diethyldithiocarbamate) is an accelerator of the rate of copper cementation. Sodium diethyldithiocarbamate reduces the incidence of HIV infection[2][3].
In Vitro	Stable heavy isotopes of hydrogen, carbon, and other elements have been incorporated into drug molecules, largely as tracers for quantitation during the drug development process. Deuteration has gained attention because of its potential to affect the pharmacokinetic and metabolic profiles of drugs ^[1] . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
