Tetrabutylammonium bromide

Cat. No.:	HY-D0172
CAS No.:	1643-19-2
Molecular Formula:	C ₁₆ H ₃₆ BrN
Molecular Weight:	322.37
Target:	Biochemical Assay Reagents
Pathway:	Others
Storage:	Store at room temperature, keep dry and cool In solvent -80°C 2 years -20°C 1 year

BIOLOGICAL ACTIVITY

Description	Tetrabutylammonium bromide is an organic ammonium compound, which is often used in catalytic reactions and separation and purification processes. It has a significant catalytic effect in some organic synthesis reactions, and can be used as a surfactant, stabilizer and antibacterial agent, etc. In addition, in some laboratory studies, this compound has also been used as an ion exchanger, solvent extractant, etc.
In Vitro	Tetrabutylammonium bromide is a biochemical reagent that can be used as a biological material or organic compound for life science related research. MCE has not independently confirmed the accuracy of these methods. They are for reference only.

Caution: Product has not been fully validated for medical applications. For research use only.
