Fluorescent Brightener 28

Cat. No.:	HY-D0367
CAS No.:	4193-55-9
Molecular Formula:	C ₄₀ H ₄₂ N ₁₂ Na ₂ O ₁₀ S ₂
Molecular Weight:	960.95
Target:	Fluorescent Dye
Pathway:	Others
Storage:	Solution, -20°C, protect from light, 2 years

BIOLOGICAL ACTIVITY

Description

Fluorescent brightener 28 is a fluorescent whitening agent commonly used in the padding process of the textile industry. Fluorescent brightener 28 is capable of staining polysaccharides such as cellulose, and when the plasma membrane ruptures, it also weakly stains the cytoplasm and strongly stains the cell nucleus. Additionally, Fluorescent brightener 28 can be utilized to detect intracellular chitin in living cells. Fluorescent Brightener 28 also is a visible light emitting diode (LED)-light sensitive photoinitiator for free radical photopolymerizations^{[1][2][3]}.
