## Sulfo Cy3 bis NHS ester

|                    |                                                                                           |
|--------------------|-------------------------------------------------------------------------------------------|
| Cat. No.:          | HY-D2486                                                                                  |
| Molecular Formula: | C <sub>41</sub> H <sub>45</sub> N <sub>4</sub> NaO <sub>14</sub> S <sub>2</sub>           |
| Molecular Weight:  | 904.93                                                                                    |
| Target:            | Fluorescent Dye                                                                           |
| Pathway:           | Others                                                                                    |
| Storage:           | Please store the product under the recommended conditions in the Certificate of Analysis. |

### BIOLOGICAL ACTIVITY

#### Description

Sulfo Cy3 bis NHS ester is a derivative of Cy3 (HY-D0822) dye containing sulfonate ions. Sulfo Cy3 bis NHS ester can be used to label the primary amines (R-NH<sub>2</sub>) of proteins, amine-modified oligonucleotides, and other amine-containing molecules.

**Caution: Product has not been fully validated for medical applications. For research use only.**
