Hypoxanthine-¹³C,¹⁵N₂

Cat. No.:	HY-N0091S1
CAS No.:	244769-71-9
Molecular Formula:	C ₄ ¹³ CH ₄ N ₂ ¹⁵ N ₂ O
Molecular Weight:	139.09
Target:	Bacterial
Pathway:	Anti-infection
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

BIOLOGICAL ACTIVITY

Description	Hypoxanthine- ¹³ C, ¹⁵ N ₂ is a ¹⁵ N-labeled and ¹³ C-labeled Furaladone. Furaladone, a nitrofurantoin agent, has the potential for the study in infections of chickens with salmonella enteritidis. Furaladone is inhibitory and bactericidal in vitro for staphylococci
In Vitro	Stable heavy isotopes of hydrogen, carbon, and other elements have been incorporated into drug molecules, largely as tracers for quantitation during the drug development process. Deuteration has gained attention because of its potential to affect the pharmacokinetic and metabolic profiles of drugs ^[75] . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
