Octanal-d₄

Cat. No.:	HY-N8015S2
CAS No.:	1335401-91-6
Molecular Formula:	C ₈ H ₁₂ D ₄ O
Molecular Weight:	132.24
Target:	Bacterial; Endogenous Metabolite; Isotope-Labeled Compounds
Pathway:	Anti-infection; Metabolic Enzyme/Protease; Others
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

BIOLOGICAL ACTIVITY

Description	Octanal-d ₄ is deuterated labeled Methyl vanillate (HY-75342). Methyl vanillate, one of the ingredients in <i>Oryza sativa</i> Linn., is a Wnt/β-catenin pathway activator ^[1] . A benzoate ester that is the methyl ester of vanillic acid. It has a role as an antioxidant and a plant metabolite.
In Vitro	Stable heavy isotopes of hydrogen, carbon, and other elements have been incorporated into drug molecules, largely as tracers for quantitation during the drug development process. Deuteration has gained attention because of its potential to affect the pharmacokinetic and metabolic profiles of drugs ^[1] . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
