N,N,N-Trimethyloctan-1-aminium chloride

Cat. No.:	HY-W014536
CAS No.:	10108-86-8
Molecular Formula:	C ₁₁ H ₂₆ ClN
Molecular Weight:	207.79
Target:	Biochemical Assay Reagents
Pathway:	Others
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

BIOLOGICAL ACTIVITY

Description	N,N,N-Trimethyloctan-1-aminium chloride is a quaternary ammonium salt consisting of a positively charged N,N,N-trimethyloctan-1-aminium cation and a negatively charged chloride anion. The compound is commonly used as a surfactant and emulsifier in a variety of applications including detergents, fabric softeners and personal care products. It can also be used as a phase transfer catalyst in organic chemical reactions, facilitating the transfer of reactants between immiscible phases. Additionally, it has antimicrobial properties and is used as a disinfectant or antiseptic in some products.
In Vitro	N,N,N-Trimethyloctan-1-aminium chloride is a biochemical reagent that can be used as a biological material or organic compound for life science related research. MCE has not independently confirmed the accuracy of these methods. They are for reference only.

Caution: Product has not been fully validated for medical applications. For research use only.
