DL-alpha-Tocopherol-d9

Cat. No.:	HY-W020044S1
CAS No.:	131230-17-6
Molecular Formula:	C ₂₉ H ₄₁ D ₉ O ₂
Molecular Weight:	439.76
Target:	Ferroptosis
Pathway:	Apoptosis
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

BIOLOGICAL ACTIVITY

Description	DL-alpha-Tocopherol-d ₉ is the deuterium labeled DL-alpha-Tocopherol[1]. DL-alpha-Tocopherol is a synthetic vitamin E, with antioxidation effect. DL-alpha-Tocopherol protects human skin fibroblasts against the cytotoxic effect of UVB[2].
In Vitro	Stable heavy isotopes of hydrogen, carbon, and other elements have been incorporated into drug molecules, largely as tracers for quantitation during the drug development process. Deuteration has gained attention because of its potential to affect the pharmacokinetic and metabolic profiles of drugs ^[1] . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
