Tetrabutylammonium trifluoromethanesulfonate

Cat. No.:	HY-W042557
CAS No.:	35895-70-6
Molecular Formula:	C ₁₇ H ₃₆ F ₃ NO ₃ S
Molecular Weight:	391.53
Target:	Biochemical Assay Reagents
Pathway:	Others
Storage:	4°C, sealed storage, away from moisture * In solvent : -80°C, 6 months; -20°C, 1 month (sealed storage, away from moisture)

BIOLOGICAL ACTIVITY

Description	Tetrabutylammonium trifluoromethanesulfonate, commonly known as TBAOTf. TBAOTf is widely used as a strong acid catalyst and phase transfer agent in organic synthesis, especially for reactions involving nucleophilic substitution, elimination, and rearrangement, in addition, it is also used as an electrolyte additive for rechargeable batteries and a stabilizer of supercritical fluids Due to its high stability, solubility and selectivity, TBAOTf is considered to be a highly efficient and multifunctional reagent in various applications.
In Vitro	Tetrabutylammonium trifluoromethanesulfonate is a biochemical reagent that can be used as a biological material or organic compound for life science related research. MCE has not independently confirmed the accuracy of these methods. They are for reference only.

Caution: Product has not been fully validated for medical applications. For research use only.
