BIOLOGICAL ACTIVITY

Description	9-Decen-1-ol has a fatty odour. This compound is used in the flavor and fragrance industry for its pleasant smell, which is often described as sweet, floral and fruity. It can also be used as an intermediate in the synthesis of various organic compounds, including medicine, agricultural chemicals and polymer materials. Its unique chemical properties make it an important ingredient in many commercial products, including soaps, detergents and cosmetics.
In Vitro	9-Decen-1-ol is a biochemical reagent that can be used as a biological material or organic compound for life science related research. MCE has not independently confirmed the accuracy of these methods. They are for reference only.

Caution: Product has not been fully validated for medical applications. For research use only.
