Cholesterol n-Octanoate

Cat. No.:	HY-W127349
CAS No.:	1182-42-9
Molecular Formula:	C ₃₅ H ₆₀ O ₂
Molecular Weight:	512.85
Target:	Liposome
Pathway:	Metabolic Enzyme/Protease
Storage:	Store at room temperature, keep dry and cool
	In solvent -80°C 2 years
	-20°C 1 year

BIOLOGICAL ACTIVITY

Description	Cholesterol n-Octanoate is an organic compound belonging to the class of esters. It is formed from the reaction between cholesterol and caprylic acid. Cholesterol n-octanoate has various applications in the pharmaceutical industry, notably as a bioactive compound with potential research potential to improve a range of medical conditions, such as high cholesterol and inflammation-related diseases. Additionally, it has potential applications as a food additive to improve texture and stability.
In Vitro	Cholesterol n-Octanoate is a biochemical reagent that can be used as a biological material or organic compound for life science related research. MCE has not independently confirmed the accuracy of these methods. They are for reference only.

Caution: Product has not been fully validated for medical applications. For research use only.
