BIOLOGICAL ACTIVITY

Description

Zineb is an agricultural fungicide of the dithiocarbamate class. Its toxicity is relatively low, and there is little evidence of human harm from exposure. Oxidative stress is one of the main factors contributing to diseases caused by Zineb. Zineb does not alter the activity of any superoxide dismutase enzymes. Catalase (CAT) activity was reduced only by Zineb.

Caution: Product has not been fully validated for medical applications. For research use only.
