Ribose-5-phosphate barium salt

Cat. No.:	HY-W145649
CAS No.:	15673-79-7
Molecular Formula:	C ₅ H ₉ BaO ₈ P
Molecular Weight:	365.42
Target:	Biochemical Assay Reagents
Pathway:	Others
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

BIOLOGICAL ACTIVITY

Description	Ribose-5-phosphate Barium Salt is an organic compound that belongs to the monosaccharide phosphate family. It is commonly used as an intermediate in various biochemical pathways, especially in the biosynthesis of nucleotides and coenzymes. Ribose-5-phosphate Barium Salt has several applications in biochemical research, including as a precursor for the synthesis of other phosphorylated sugars and as a substrate for enzymes involved in the pentose phosphate pathway. In addition, it can be used as an energy source and dietary supplement for certain microorganisms.
In Vitro	Ribose-5-phosphate Barium Salt is a biochemical reagent that can be used as a biological material or organic compound for life science related research. MCE has not independently confirmed the accuracy of these methods. They are for reference only.

Caution: Product has not been fully validated for medical applications. For research use only.
