Protonstatin-1

Cat. No.:	HY-W317853
CAS No.:	521972-99-6
Molecular Formula:	C ₈ H ₅ NO ₂ S ₂
Molecular Weight:	211.26
Target:	Proton Pump
Pathway:	Membrane Transporter/Ion Channel
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

BIOLOGICAL ACTIVITY

Description	Protonstatin-1 is a selective plasma membrane (PM) H ⁺ -ATPase inhibitor (IC ₅₀ of 3.9 μM) that inhibits auxin transport. Protonstatin-1 interacts with the PM H ⁺ -ATPase central loop and may thus impede the functions of the N- and/or P-domain to inhibit the pump activity ^{[1][2]} .
In Vitro	Protonstatin-1 (25 μM) decreases the inhibition of AHA2 activity in yeast strain RS72-AHA2, resulting in decreased yeast cell growth ^[2] . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
