Hydrocinnamic acid-d₂

Cat. No.:	HY-Y1088S1
CAS No.:	19136-97-1
Molecular Formula:	C ₉ H ₈ D ₂ O ₂
Molecular Weight:	152.19
Target:	Endogenous Metabolite
Pathway:	Metabolic Enzyme/Protease
Storage:	Please store the product under the recommended conditions in the Certificate of Analysis.

BIOLOGICAL ACTIVITY

Description	Hydrocinnamic acid-d ₂ is the deuterium labeled Hydrocinnamic acid[1]. Hydrocinnamic acid is the major rhizospheric compound with known growth regulatory activities[2].
In Vitro	Stable heavy isotopes of hydrogen, carbon, and other elements have been incorporated into drug molecules, largely as tracers for quantitation during the drug development process. Deuteration has gained attention because of its potential to affect the pharmacokinetic and metabolic profiles of drugs ^[1] . MCE has not independently confirmed the accuracy of these methods. They are for reference only.
