Datasheet for 008-0103

Horse IgG Fc fragment

Overview

Description:	Horse IgG Fc Fragment - 008-0103
Item No.:	008-0103
Size:	1 mg
Applications:	SDS-PAGE, IHC
Origin:	Horse

Product Details

Background:	Secreted as part of the adaptive immune response by plasma B cells, immunoglobulin G constitutes 75% of serum immunoglobulins. Immunoglobulin G binds to viruses, bacteria, as well as fungi and facilitates their destruction or neutralization via agglutination (and thereby immobilizing them), activation of the compliment cascade, and opsonization for phagocytosis. This product possesses the F(c) region, recognized by high-affinity Fc receptor proteins.
Synonyms:	Horse immunoglobulin G F(c), IgG F(c), Horse Fc Fragment
Species of Origin:	Horse
Format:	IgG Fc
Type:	Native Protein

Target Details

Purity/Specificity:	Horse IgG F(c) fragment was prepared from normal serum by a multi-step process which includes delipidation, salt fractionation, ion exchange chromatography and papain digestion followed by chromatographic separation and extensive dialysis against the buffer stated above. Horse IgG F(c) fragment assayed by immunoelectrophoresis resulted in a single precipitin arc against anti-Horse Serum, anti-Horse IgG and anti-Horse IgG F(c). No reaction was observed against anti-Horse IgG F(ab') ₂ or anti-Papain.
----------------------------	--

Application Details

Tested Applications:	SDS-PAGE
-----------------------------	----------

Suggested Applications:	IHC (Based on references)
Application Note:	Horse IgG F(c) Fragment has been tested in SDS-Page and can be utilized as a control or standard reagent in Western Blotting and ELISA experiments.
Assay Dilutions:	All assays should be optimized by the user. Recommended dilutions (if any) may be listed below.
ELISA:	User Optimized
IHC:	User Optimized
WB:	User Optimized

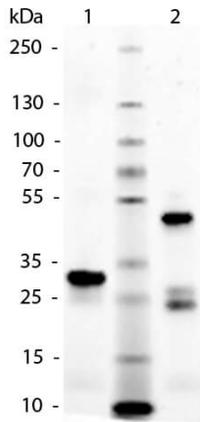

Formulation

Physical State:	Liquid (sterile filtered)
Concentration:	1.0 mg/mL by UV absorbance at 280 nm
Buffer:	0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2
Preservative:	0.01% (w/v) Sodium Azide

Shipping & Handling

Shipping Condition:	Wet Ice
Storage Condition:	Store vial at 4° C prior to opening. This product is stable 4° C as an undiluted liquid. Dilute only prior to immediate use. For extended storage mix with an equal volume of glycerol, aliquot contents and freeze at -20° C or below. Avoid cycles of freezing and thawing.
Expiration:	Expiration date is one (1) year from date of receipt.

Images

**Western Blot**

SDS-Page of Horse IgG F(c) Fragment. Lane 1: Horse IgG F(c) Fragment – Reduced. Lane 2: Horse IgG F(c) Fragment – Non-reduced. Load: 1.0 µg per lane. Predicted/Observed Size: Reduced- 25 kDa, Non-Reduced- 50 kDa.
