Datasheet for 110-1103

Mouse IgG Fc Antibody

Overview

Description:	Goat Anti-Mouse IgG Fc Antibody - 110-1103
Item No.:	110-1103
Size:	2 mL
Applications:	WB
Reactivity:	Mouse
Host Species:	Goat

Product Details

Background:	Anti-Mouse IgG F(c) generated in goat is a proteolytic fragment of immunoglobulin G (IgG) obtained by limited digestion with the enzyme papain under controlled conditions of temperature, time and pH. Receptors bind the Fc portion of mouse IgG and often this fragment is removed from immunoglobulins to minimize receptor binding and lower background reactivity.
Synonyms:	goat anti-Mouse IgG F(c) fragment Antibody, goat anti-Mouse IgG Fc fragment Antibody, rabbit anti Mouse IgG Fc
Host Species:	Goat
Specificity:	IgG Fc
Clonality:	Polyclonal
Format:	Antiserum

Target Details

Reactivity:	Mouse
Immunogen:	Mouse IgG F(c) fragment
Purity/Specificity:	This product was prepared from monospecific antiserum by delipidation and defibrination. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-goat serum, Mouse IgG, Mouse IgG F(c) and Mouse Serum. No reaction was observed against Mouse IgG F (ab).

Application Details

Suggested Applications:	WB (Based on references)
Application Note:	This product is designed for immunofluorescence microscopy, fluorescence based plate assays (FLISA) and fluorescent western blotting. This product is also suitable for multiplex analysis, including multicolor imaging, utilizing various commercial platforms.
Assay Dilutions:	All assays should be optimized by the user. Recommended dilutions (if any) may be listed below.
ELISA:	1:20,000 - 1:100,000
IHC:	1:1,000 - 1:5,000
WB:	1:2,000 - 1:10,000

Formulation

Physical State:	Lyophilized
Concentration:	85 mg/mL by Refractometry
Buffer:	0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2
Preservative:	0.01% (w/v) Sodium Azide
Stabilizer:	None
Reconstitution Volume:	2.0 mL
Reconstitution Buffer:	Restore with deionized water (or equivalent)

Shipping & Handling

Shipping Condition:	Ambient
Storage Condition:	Store vial at 4° C prior to restoration. For extended storage aliquot contents and freeze at -20° C or below. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted liquid. Dilute only prior to immediate use.
Expiration:	Expiration date is one (1) year from date of receipt.

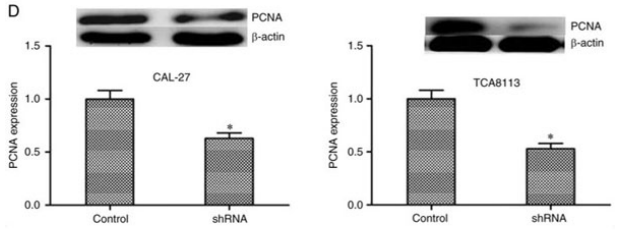
Western Blot

KIF20B shRNA efficiency. (B) The shRNA efficiency measured by western blotting. Primary antibodies used rabbit anti-KIF20B antibody [1:100] and mouse anti-β-actin [1:500] with goat anti-rabbit [1:10,000] p/n 711–1122 and goat anti-mouse Fc secondary antibody [1:10,000] p/n 110–1103. *P<0.05 vs. control. KIF, kinesin family member; shRNA, short hairpin RNA. Figure 2. PMID: 30664160.



Western Blot

KIF20B knockdown inhibits cell proliferation. (D) Expression of proliferation marker PCNA in shRNA cells and control cells, measured by western Blotting. Primary antibodies used mouse anti-(PCNA) proliferating cell nuclear antigen [1:1000] and mouse anti-β-actin [1:500] with goat anti-mouse Fc secondary antibody [1:10,000] p/n 110–1103. Knocking down KIF20B inhibited PCNA expression. *P<0.05 vs. control. KIF, kinesin family member; PCNA, proliferating cell nuclear antigen; shRNA, short hairpin RNA. Figure 3. PMID: 30664160.
