#### Datasheet for 303-4102

# F(ab')2 Chicken IgG (H&L) Antibody

#### **Overview**

| Description:  | Rabbit F(ab')2 Anti-Chicken IgG (H&L) Antibody - 303-4102 |
|---------------|---|
| Item No.:     | 303-4102  |
| Size:         | 20 mg   |
| Reactivity:   | Chicken   |
| Host Species: | Rabbit  |

## **Product Details**

| Synonyms: rabbit F(ab')2 Anti-Chicken IgG Antibody, rabbit Fab2 Anti-Chicken IgG Antibody, rabbit Fab2 Anti-Chicken IgY Antibody, rabbit Fab2 Anti-Chicken IgY Antibody, rabbit Fab2 Anti-Chicken IgY  Host Species: Rabbit  Specificity: IgG (H&L)  Clonality: Polyclonal  Format: IgG F(ab')2 | Background:   | F(ab')2 Antibody was generated by enzymatic cleavage and subsequent separation from the Fc fragment. Because of their smaller size, F(ab)2 fragments offer several advantages over intact antibodies for use in certain immunochemical techniques and experimental applications. F(ab)2 fragments penetrate into tissue samples and show better antigen recognition and signal generation in IHC. F(ab)2 fragments lack the Fc region and therefore do not bind Fc receptors which effectively lowers background staining. F(ab')2 Antibody is ideal for investigators who routinely perform flow cytometry, immunohistochemistry or IHC and other immunoassays. |
|---|---------------|--|
| Specificity: IgG (H&L) Clonality: Polyclonal  | Synonyms:     | Anti Chicken IgG, rabbit F(ab')2 Anti-Chicken IgY Antibody, rabbit Fab2 Anti-Chicken IgY   |
| Clonality: Polyclonal   | Host Species: | Rabbit   |
|   | Specificity:  | IgG (H&L)  |
| Format: IgG F(ab')2   | Clonality:    | Polyclonal   |
|   | Format:       | IgG F(ab')2  |

# **Target Details**

| Reactivity: | Chicken                    |
|-------------|----------------------------|
| Immunogen:  | Chicken IgG whole molecule |

**Purity/Specificity:** 

This product is a F(ab')2 fragment of IgG fraction antibody purified from monospecific antiserum by a multi-step process which includes delipidation, salt fractionation, ion exchange chromatography and pepsin digestion followed by chromatographic separation and extensive dialysis against the buffer stated above. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-Rabbit Serum, Chicken IgG and Chicken Serum. No reaction was observed against anti-Rabbit IgG F(c) or anti-Pepsin.

### **Application Details**

| Application Note:   | Suitable for immunomicroscopy           | and flow cytometry    | or FACS analysi  | is as well as other antibody |
|---------------------|---|-----------------------|------------------|------------------------------|
| , ipplication recta | Saltable for illimitation illicitoscopy | aria riott cytorricti | y or integration | is as well as other arresour |

based fluorescent assays requiring extremely low background levels, absence of F(c) mediated binding, lot-to-lot consistency, high titer and specificity. The maximum amount of reagent required to stain 1 x 10E6 cells in flow cytometry is approximately 1.0  $\mu$ g of antibody. Lesser amounts of reagent may be sufficient for staining. Optimal titers for other applications should be determined by the researcher. As a general guideline dilutions of 1:100 to 1:250 should be

suitable for most applications.

| Assa | / Dilutions: | All assays should be | optimized by the | user. Recommended | dilutions (if any) may be |
|------|--------------|----------------------|------------------|-------------------|---------------------------|
|------|--------------|----------------------|------------------|-------------------|---------------------------|

listed below.

**ELISA:** 1:20,000 - 1:100,000

IHC: 1:1,000 - 1:5,000

**WB:** 1:2,000 - 1:10,000

#### **Formulation**

| Physical State: |  | Lyophi | lize | d |  |  |
|-----------------|--|--------|------|---|--|--|
|                 |  |        |      |   |  |  |

**Concentration:** 12.5 mg/mL by UV absorbance at 280 nm

**Buffer:** 0.01 M Sodium Phosphate, 0.15 M Sodium Chloride, pH 7.2

**Preservative:** 0.01% (w/v) Sodium Azide

Stabilizer: None

**Reconstitution Volume:** 2.0 mL

**Reconstitution Buffer:** Restore with deionized water (or equivalent)

### **Shipping & Handling**

Shipping Condition: Ambient

#### Order online now!

www.rockland.com tech@rockland.com +1 484.791.3823

**Storage Condition:** Store vial at 4° C prior to restoration. For extended storage aliquot contents and freeze at -20°

C or below. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an

undiluted liquid. Dilute only prior to immediate use.

**Expiration:** Expiration date is one (1) year from date of receipt.

#### **Disclaimer**

This product is for research use only and is not intended for therapeutic or diagnostic applications. Please contact a technical service representative for more information. All products of animal origin manufactured by Rockland Immunochemicals are derived from starting materials of North American origin. Collection was performed in United States Department of Agriculture (USDA) inspected facilities and all materials have been inspected and certified to be free of disease and suitable for exportation. All properties listed are typical characteristics and are not specifications. All suggestions and data are offered in good faith but without guarantee as conditions and methods of use of our products are beyond our control. All claims must be made within 30 days following the date of delivery. The prospective user must determine the suitability of our materials before adopting them on a commercial scale. Suggested uses of our products are not recommendations to use our products in violation of any patent or as a license under any patent of Rockland Immunochemicals, Inc. If you require a commercial license to use this material and do not have one, then return this material, unopened to: Rockland Inc., P.O. BOX 5199, Limerick, Pennsylvania, USA.
