# Datasheet for 609-144-002-0.5 Human IgG (H&L) Antibody Dylight™ 680 Conjugated

## **Overview**

Description:	Goat Anti-Human IgG (H&L) Antibody DyLight™ 680 Conjugated (5 X 100 μg) - 609-144-002-0.5			
Item No.:	609-144-002-0.5			
Size:	5 x 100 μg			
Applications:	Dot Blot, WB, Microarray			
Reactivity:	Human			
Host Species:	Goat			

## **Product Details**

Background:	Anti-Human IgG (H&L) DyLight 680 generated in goat detects human Immunoglobulin G (IgG), both heavy and light chains of the antibody molecule are present. It is a protein complex composed of four peptide chains — two identical heavy chains and two identical light chains arranged in a Y-shape typical of antibody monomers. Each IgG has two antigen binding sites. Representing approximately 75% of serum immunoglobulins in humans, IgG is the most abundant antibody isotype found in the circulation. IgG molecules are synthesized and secreted by plasma B cells. Secondary Antibodies are available in a variety of formats and conjugate types. When choosing a secondary antibody product, consideration must be given to species and immunoglobulin specificity, conjugate type, fragment and chain specificity, level of cross- reactivity, and host-species source and fragment composition.
Synonyms:	goat anti-Human IgG DyLight™ 680 conjugated Antibody, goat anti-Human IgG Antibody DyLight™680 conjugation
Host Species:	Goat
Specificity:	IgG (H&L)
Conjugate:	DyLight™ 680
Clonality:	Polyclonal
Format:	lgG
F/P Ratio:	2.8

## **Target Details**

www.rockland.com tech@rockland.com +1 484.791.3823

Reactivity:	Human		
Immunogen:	Human IgG, whole molecule		
Purity/Specificity:	This product was prepared from monospecific antiserum by immunoaffinity chromatography using Human IgG coupled to agarose beads followed by conjugation to fluorochrome and extensive dialysis against the buffer stated above. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-Goat Serum, Human IgG and Human Serum. This antibody will react with heavy chains of Human IgG and with light chains of most Human immunoglobulins.		

# **Application Details**

Tested Applications:	Dot Blot, WB			
Suggested Applications:	Microarray (Based on references)			
Application Note:	Anti-Human IgG (H&L) DyLight 680 has been tested by dot blot and western blot and is designed for immunofluorescence microscopy, fluorescence based plate assays (FLISA) and fluorescent western blotting. This product is also suitable for multiplex analysis, including multicolor imaging, utilizing various commercial platforms. The emission spectra for this DyLight <sup>™</sup> conjugate match the principle output wavelengths of most common fluorescence instrumentation.			
Assay Dilutions:	All assays should be optimized by the user. Recommended dilutions (if any) may be listed below.			
FLISA:	>1:20,000			
IF:	>1:5,000			
WB:	>1:10,000			

## Formulation

Physical State:	Lyophilized			
Concentration:	1.0 mg/mL by UV absorbance at 280 nm			
Buffer:	0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2			
Preservative:	0.01% (w/v) Sodium Azide			
Stabilizer:	10 mg/mL Bovine Serum Albumin (BSA) - Immunoglobulin and Protease free			
Reconstitution Volume:	100 μL			
<b>Reconstitution Buffer:</b>	Restore with deionized water (or equivalent)

## **Shipping & Handling**

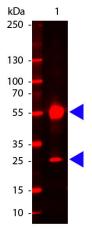

Shipping Condition:	Ambient		
Storage Condition:	Store vial at 4° C prior to restoration. For extended storage aliquot contents and freeze at -20° C or below. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted liquid. Dilute only prior to immediate use.		
Expiration:	Expiration date is one (1) year from date of receipt.		

#### Images

#### Western Blot

DyLight<sup>™</sup> dyes can be used for two-color Western Blot detection with low background and high signal. Anti-tubulin was detected using a DyLight<sup>™</sup> 680 conjugate. Anti-TNFa was detected using a DyLight<sup>™</sup> 800 conjugate. The image was captured using the Odyssey<sup>®</sup> Infrared Imaging System developed by LI-COR.

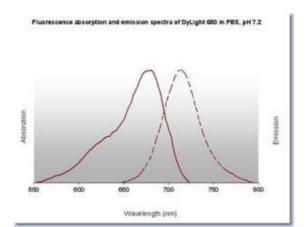

#### Western Blot

Western Blot of Dylight<sup>™</sup> 680 Conjugated Goat anti-Human IgG antibody. Lane 1: Human IgG. Lane 2: none. Load: 50 ng per lane. Primary antibody: none. Secondary antibody: Dylight<sup>™</sup> 680 human secondary antibody at 1:5,000 for 60 min at RT. Block: MB-070 for 30 min at RT. Predicted/Observed size: 55 kDa, 28 kDa for Human IgG. Other band(s): none.
