# Datasheet for 609-145-007 Human IgM (mu chain) Antibody DyLight™ 800 Conjugated

#### **Overview**

Description:	Goat Anti-Human IgM (mu chain) Antibody DyLight™ 800 Conjugated - 609-145-007			
Item No.:	609-145-007			
Size:	100 µg			
Applications:	Dot Blot, Microarray			
Reactivity:	Human			
Host Species:	Goat			

## **Product Details**

Background:	Anti-Human IgM (mu heavy chain) DyLight 800 generated in goat detects specifically Human IgM mu heavy chain. Immunoglobulin M is the largest antibody isotype and the first to be secreted against an initial exposure to antigen. IgM is predominantly produced in the spleen. Formed from covalently linking 5 immunoglobulins together. Anti-Human IgM mu chain antibody is ideal for investigators in Immunology, Microbiology, and Cell Biology.
Synonyms:	Goat Anti-Human IgM (mu chain) Antibody DyLight™ 800 Conjugated, Goat Anti Human IgM (mu chain) Antibody DyLight™ 800 Conjugated
Host Species:	Goat
Specificity:	lgM μ chain
Conjugate:	DyLight™ 800
Clonality:	Polyclonal
Format:	lgG
F/P Ratio:	2.4

## **Target Details**

Reactivity:	Human
Immunogen:	Human IgM whole molecule

#### **Purity/Specificity:**

This product was prepared from monospecific antiserum by immunoaffinity chromatography using Human IgM coupled to agarose beads followed by solid phase adsorption(s) to remove any unwanted reactivities. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-Goat Serum, Human IgM and Human Serum. No reaction was observed against other human heavy or light chain proteins.

## **Application Details**

<b>Tested Applications:</b>	Dot Blot		
Suggested Applications:	Microarray (Based on references)		
Application Note:	Anti-Human IgM (mu heavy chain) DyLight 800 has been tested by dot blot. Anti-Human IgM (mu heavy chain) DyLight 800 is designed for immunofluorescence microscopy, fluorescence based plate assays (FLISA) and fluorescent western blotting. This product is also suitable for multiplex analysis, including multicolor imaging, utilizing various commercial platforms. The emission spectra for this DyLight <sup>™</sup> conjugate match the principle output wavelengths of most common fluorescence instrumentation.		
Assay Dilutions:	All assays should be optimized by the user. Recommended dilutions (if any) may be listed below.		
FLISA:	>1:20,000		
IF:	>1:5,000		
WB:	>1:10,000		

## **Formulation**

Physical State:	Lyophilized		
Concentration:	1.0 mg/mL by UV absorbance at 280 nm		
Buffer:	0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2		
Preservative:	0.01% (w/v) Sodium Azide		
Stabilizer:	10 mg/mL Bovine Serum Albumin (BSA) - Immunoglobulin and Protease free		
<b>Reconstitution Volume:</b>	100 μL		
Reconstitution Buffer:	Restore with deionized water (or equivalent)		

## **Shipping & Handling**

Shipping Condition: Ambient

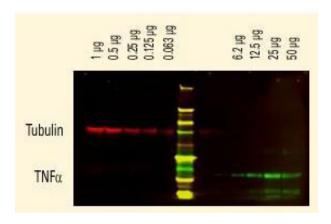

#### Order online now!

Storage Condition:	Store vial at 4° C prior to restoration. For extended storage aliquot contents and freeze at -20° C or below. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted liquid. Dilute only prior to immediate use.
Expiration:	Expiration date is one (1) year from date of receipt.

#### Images

#### **Western Blot**

DyLight<sup>™</sup> dyes can be used for two-color Western Blot detection with low background and high signal. Anti-tubulin was detected using a DyLight<sup>™</sup> 680 conjugate. Anti-TNFa was detected using a DyLight<sup>™</sup> 800 conjugate. The image was captured using the Odyssey<sup>®</sup> Infrared Imaging System developed by LI-COR.

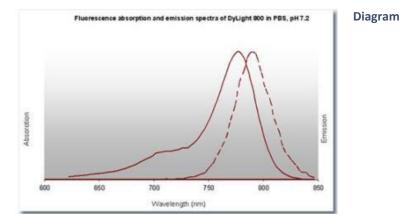

#### **Diagram** Properties of DyLight<sup>™</sup> Conjugates.

Emission	Color	DyLight™ Dye	Ex/Em (nm)	€ (M <sup>-1</sup> cm <sup>-1</sup> )	Similar Dyes
