Datasheet for 610-742-124

Mouse IgG (H&L) Antibody DyLight™ 549 Conjugated Pre-Adsorbed

Overview

| Description: | Donkey Anti-Mouse IgG (H&L) Antibody DyLight™ 549 Conjugated (Min X Bv Ch Gt GP Ham Hs Hu Rb Rt & Sh Serum Proteins) - 610-742-124 | | | |
|---------------|---|--|--|--|
| Item No.: | 610-742-124 | | | |
| Size: | 100 μg | | | |
| Applications: | WB, IF, IHC, Multiplex | | | |
| Reactivity: | Mouse | | | |
| Host Species: | Donkey | | | |

Product Details

| Background: | Anti-Mouse IgG DyLight549 Antibody ger | enerated in donkey detects reactivity to Mouse IgG. |
|-------------|--|---|
| | | |

Secreted as part of the adaptive immune response by plasma B cells, immunoglobulin G constitutes 75% of serum immunoglobulins. Immunoglobulin G binds to viruses, bacteria, as well as fungi and facilitates their destruction or neutralization via agglutination (and thereby immobilizing them), activation of the compliment cascade, and opsonization for phagocytosis. The whole IgG molecule possesses both the F(c) region, recognized by high-affinity Fc receptor proteins, as well as the F(ab) region possessing the epitope-recognition site. Both the Heavy and Light chains of the antibody molecule are present. Secondary Antibodies are available in a variety of formats and conjugate types. When choosing a secondary antibody product, consideration must be given to species and immunoglobulin specificity, conjugate type, fragment and chain specificity, level of cross-reactivity, and host-species source and fragment composition.

| | composition. |
|----------------------|---|
| Synonyms: | Donkey anti-Mouse IgG DyLight 549™ Conjugated Antibody, Donkey anti Mouse IgG Antibody DyLight 549™ Conjugation |
| Host Species: | Donkey |
| Specificity: | IgG (H&L) |
| Conjugate: | DyLight™ 549 |
| Clonality: | Polyclonal |
| Format: | IgG |
| F/P Ratio: | 3.8 |

Target Details

| Reactivity: | Mouse IgG whole molecule | | |
|--------------------------------|---|--|--|
| Immunogen: Purity/Specificity: | | | |
| | This product was prepared from monospecific antiserum by immunoaffinity chromatography using Mouse IgG coupled to agarose beads followed by solid phase adsorption(s) to remove any unwanted reactivities. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-Donkey Serum, Mouse IgG and Mouse Serum. No reaction was observed against Bovine, Chicken, Goat, Guinea Pig, Hamster, Horse, Human, Rabbit, Rat and Sheep Serum Proteins. This antibody will react with heavy chains of mouse IgG and with light chains of most mouse immunoglobulins. | | |

Application Details

| Tested Applications: | WB | | |
|-----------------------------|---|--|--|
| Suggested Applications: | IF, IHC, Multiplex (Based on references) | | |
| Application Note: | Anti-Mouse IgG DyLight549 Antibody has been tested by western bot and is designed for immunofluorescence microscopy, fluorescence based plate assays (FLISA) and fluorescent western blotting. This product is also suitable for multiplex analysis, including multicolor imaging, utilizing various commercial platforms. The emission spectra for this DyLight™ conjugate match the principle output wavelengths of most common fluorescence instrumentation. | | |
| Assay Dilutions: | All assays should be optimized by the user. Recommended dilutions (if any) may be listed below. | | |
| FLISA: | >1:20,000 | | |
| IF: | >1:5,000 | | |
| WB: | >1:10,000 | | |
| | | | |

Formulation

| Physical State: | Lyophilized | | |
|-----------------|--|--|--|
| Concentration: | 1.0 mg/mL by UV absorbance at 280 nm | | |
| Buffer: | 0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2 | | |
| Preservative: | 0.01% (w/v) Sodium Azide | | |
| Stabilizer: | 10 mg/mL Bovine Serum Albumin (BSA) - Immunoglobulin and Protease free | | |

Reconstitution Volume: 100 μL

Reconstitution Buffer: Restore with deionized water (or equivalent)

Shipping & Handling

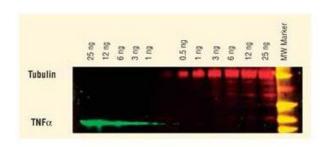

| Shipping Condition: | Ambient | | |
|----------------------------|---|--|--|
| Storage Condition: | Store vial at 4° C prior to restoration. For extended storage aliquot contents and freeze at -20° C or below. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted liquid. Dilute only prior to immediate use. | | |
| Expiration: | Expiration date is one (1) year from date of receipt. | | |

Immunofluorescence Microscopy

DyLight[™] dyes can be used for two-color Western Blot detection with low background and high signal. Anti-tubulin was detected using a DyLight[™] 549 conjugate. Anti-TNFa was detected using a DyLight[™] 649 conjugate. The image was captured using the Typhoon[™] 9410 Imaging System.

Western Blot

Western Blot of DyLight™ 549 conjugated Donkey Anti-Mouse IgG Pre-Adsorbed secondary antibody. Lane 1: Mouse IgG. Lane 2: None. Load: 50 ng per lane. Primary antibody: None. Secondary antibody: DyLight™ 549 donkey secondary antibody at 1:1,000 for 60 min at RT. Blocking: MB-070 for 30 min at RT. Predicted/Observed size: 25 & 55 kDa, 25 & 55 kDa for Mouse IgG. Other band(s): None.
