# Rabbit IgG (H&L) Antibody DyLight™ 549 Conjugated Pre-Adsorbed

#### **Overview**

Description:	Goat Anti-Rabbit IgG (H&L) Antibody DyLight™ 549 Conjugated (Min X Bv Ch Gt GP Ham Hs Hu Ms Rt & Sh Serum Proteins) - 611-142-122			
Item No.:	611-142-122			
Size:	100 μg			
Applications:	Dot Blot, WB, IHC			
Reactivity:	Rabbit			
Host Species:	Goat			

#### **Product Details**

Background:	Anti-Rabbit IgG (H&L) DyLight 549 Antibody generated in goat detects reactivity t	to Rabbit IgG.
		a and a second s

Secreted as part of the adaptive immune response by plasma B cells, immunoglobulin G constitutes 75% of serum immunoglobulins. Immunoglobulin G binds to viruses, bacteria, as well as fungi and facilitates their destruction or neutralization via agglutination (and thereby immobilizing them), activation of the compliment cascade, and opsonization for phagocytosis. The whole IgG molecule possesses both the F(c) region, recognized by high-affinity Fc receptor proteins, as well as the F(ab) region possessing the epitope-recognition site. Both the Heavy and Light chains of the antibody molecule are present. Secondary Antibodies are available in a variety of formats and conjugate types. When choosing a secondary antibody product, consideration must be given to species and immunoglobulin specificity, conjugate type, fragment and chain specificity, level of cross-reactivity, and host-species source and fragment composition.

Synonyms:	Goat anti-Rabbit IgG Antibody DyLight™549 Conjugation, Goat anti-Rabbit IgG DyLight™ 549 Conjugated Antibody
<b>Host Species:</b>	Goat
Specificity:	IgG (H&L)
Conjugate:	DyLight™ 549

Clonality:	Polyclonal
Format:	IgG
F/P Ratio:	4.2

# **Target Details**

Reactivity:	Rabbit IgG whole molecule		
Immunogen: Purity/Specificity:			
	This product was prepared from monospecific antiserum by immunoaffinity chromatography using Rabbit IgG coupled to agarose beads followed by solid phase adsorption(s) to remove any unwanted reactivities. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-Goat Serum, Rabbit IgG and Rabbit Serum. No reaction was observed against Bovine, Chicken, Goat, Guinea Pig, Hamster, Horse, Human, Mouse, Rat and Sheep Serum Proteins. This antibody will react with heavy chains of rabbit IgG and with light chains of most rabbit immunoglobulins.		

# **Application Details**

Tested Applications: Dot Blot, WB				
Suggested Applications:	IHC (Based on references)			
Application Note:	Anti-Rabbit IgG (H&L) DyLight 549 Antibody has been tested by dot blot and western blot and is designed for immunofluorescence microscopy, fluorescence based plate assays (FLISA) and fluorescent western blotting. This product is also suitable for multiplex analysis, including multicolor imaging, utilizing various commercial platforms. The emission spectra for this DyLight™ conjugate match the principle output wavelengths of most common fluorescence instrumentation.			
Assay Dilutions:	All assays should be optimized by the user. Recommended dilutions (if any) may be listed below.			
FLISA:	>1:20,000			
IF:	>1:5,000			
WB:	>1:10,000			

## **Formulation**

Physical State:	Lyophilized		
Concentration:	1.0 mg/mL by UV absorbance at 280 nm		
Buffer:	0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2		
Preservative:	0.01% (w/v) Sodium Azide		
Stabilizer:	10 mg/mL Bovine Serum Albumin (BSA) - Immunoglobulin and Protease free		

www.rockland.com Page 2 of 5

Reconstitution Volume:	100 μL		
Reconstitution Buffer:	Restore with deionized water (or equivalent)		

## **Shipping & Handling**

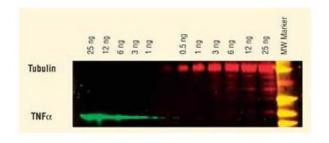

<b>Shipping Condition:</b>	Ambient  Store vial at 4° C prior to restoration. For extended storage aliquot contents and freeze at -20° C or below. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted liquid. Dilute only prior to immediate use.		
Storage Condition:			
Expiration:	Expiration date is one (1) year from date of receipt.

Infrared		800	770/794	270,000	IRDye™ 800

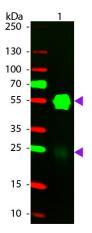

#### **Western Blot**

DyLight<sup>™</sup> dyes can be used for two-color western blot detection with low background and high signal. Anti-tubulin was detected using a DyLight<sup>™</sup> 549 conjugate. Anti-TNFa was detected using a DyLight<sup>™</sup> 649 conjugate. The image was captured using the Typhoon<sup>™</sup> 9410 Imaging System.

#### **Western Blot**

Western blot of DyLight™ 549 conjugated Goat Anti-Rabbit IgG Pre-Adsorbed secondary antibody. Lane 1: Rabbit IgG. Lane 2: None. Load: 50 ng per lane. Primary antibody: None. Secondary antibody: DyLight™ 549 goat secondary antibody at 1:1,000 for 60 min at RT. Blocking: MB-070 for 30 min at RT. Predicted/Observed size: 25 & 55 kDa, 25 & 55 kDa for Rabbit IgG. Other band(s): None.
