## Datasheet for 611-506-122

## Rabbit IgG (H&L) Secondary Antibody Biotin Conjugated Pre-Adsorbed

### Overview

<b>Description:</b>	Rat Anti-Rabbit IgG (H&L) Antibody Biotin Conjugated (Min X Hu, Gt, Ms Serum Proteins) - 611-506-122
<b>Item No.:</b>	611-506-122
<b>Size:</b>	1 mg
<b>Applications:</b>	ELISA, IF
<b>Reactivity:</b>	Rabbit
<b>Host Species:</b>	Rat

### Product Details

<b>Background:</b>	Anti-Rabbit IgG (H&L) generated in rat detects rabbit Immunoglobulin G. Both the Heavy and Light chains of the antibody molecule are present. Representing approximately 75% of serum immunoglobulins, IgG is the most abundant antibody isotype found in the circulation. IgG molecules are synthesized and secreted by plasma B cells. Secondary Antibodies are available in a variety of formats and conjugate types. When choosing a secondary antibody product, consideration must be given to species and immunoglobulin specificity, conjugate type, fragment and chain specificity, level of cross-reactivity, and host-species source and fragment composition. This Anti-Rabbit IgG is conjugated to biotin.
<b>Synonyms:</b>	Rat Anti-Rabbit IgG Biotin Conjugated Antibody, Rat Anti-Rabbit IgG Antibody Biotin Conjugation
<b>Host Species:</b>	Rat
<b>Specificity:</b>	IgG (H&L)
<b>Conjugate:</b>	Biotin
<b>Clonality:</b>	Polyclonal
<b>Format:</b>	IgG

### Target Details

<b>Reactivity:</b>	Rabbit
--------------------	--------

<b>Immunogen:</b>	Rabbit IgG whole molecule
<b>Purity/Specificity:</b>	This product was prepared from monospecific antiserum by immunoaffinity chromatography using Rabbit IgG coupled to agarose beads followed by solid phase adsorption(s) to remove any unwanted reactivities. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-biotin, anti-Rat Serum, Rabbit IgG and Rabbit Serum. No reaction was observed against Human, Goat and Mouse Serum Proteins.

## Application Details

<b>Tested Applications:</b>	ELISA
<b>Suggested Applications:</b>	IF (Based on references)
<b>Application Note:</b>	Anti-Rabbit IgG Biotin Conjugated Antibody has been tested by ELISA and is assayed against 1.0 ug of Rabbit IgG in a standard capture ELISA using Peroxidase Conjugated Streptavidin #S000-03 and ABTS (2,2'-azino-bis-[3-ethylbenthiazoline-6-sulfonic acid]) code # ABTS-100 as a substrate for 30 minutes at room temperature. A working dilution of 1:12,000 to 1:52,000 is suggested for this product.
<b>Assay Dilutions:</b>	All assays should be optimized by the user. Recommended dilutions (if any) may be listed below.
<b>ELISA:</b>	1:20,000 - 1:100,000
<b>IHC:</b>	1:1,000 - 1:5,000
<b>WB:</b>	1:2,000 - 1:10,000

## Formulation

<b>Physical State:</b>	Lyophilized
<b>Concentration:</b>	1.0 mg/mL by UV absorbance at 280 nm
<b>Buffer:</b>	0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2
<b>Preservative:</b>	0.01% (w/v) Sodium Azide
<b>Stabilizer:</b>	10 mg/mL Bovine Serum Albumin (BSA) - Immunoglobulin and Protease free
<b>Reconstitution Volume:</b>	1.0 mL
<b>Reconstitution Buffer:</b>	Restore with deionized water (or equivalent)

## Shipping & Handling

<b>Shipping Condition:</b>	Ambient
----------------------------	---------

**Storage Condition:** Store vial at 4° C prior to restoration. For extended storage aliquot contents and freeze at -20° C or below. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted liquid. Dilute only prior to immediate use.

**Expiration:** Expiration date is one (1) year from date of receipt.

## Images

## ELISA

ELISA Results of Rat Anti-Rabbit IgG Antibody Biotin Conjugated (Min X Hu Gt Ms Serum Proteins) tested against purified Rabbit IgG MX3 Biotin. Each well was coated in duplicate with 1.0 µg of Rabbit IgG (p/n 011-0102). The working dilution is 1:62,000. The starting dilution of antibody was 5µg/ml and the X-axis represents the Log10 of a 3-fold dilution. This titration is a 4-parameter curve fit where the IC50 is defined as the titer of the antibody. Assay performed using HRP Conjugation Stabilizer (p/n MB-076), Streptavidin-HRP conjugated (p/n S000-03), and TMB substrate (p/n TMBE-1000).
