**Datasheet for 611-744-002****Rabbit IgG (H&L) Antibody DyLight™ 680 Conjugated****Overview**

<b>Description:</b>	Donkey Anti-Rabbit IgG (H&L) Antibody DyLight™ 680 Conjugated - 611-744-002
<b>Item No.:</b>	611-744-002
<b>Size:</b>	100 µg
<b>Applications:</b>	Dot Blot, WB
<b>Reactivity:</b>	Rabbit
<b>Host Species:</b>	Donkey

**Product Details**

<b>Background:</b>	Anti-Rabbit IgG (H&L) DyLight 680 Antibody generated in donkey detects reactivity to Rabbit IgG. Secreted as part of the adaptive immune response by plasma B cells, immunoglobulin G constitutes 75% of serum immunoglobulins. Immunoglobulin G binds to viruses, bacteria, as well as fungi and facilitates their destruction or neutralization via agglutination (and thereby immobilizing them), activation of the complement cascade, and opsonization for phagocytosis. The whole IgG molecule possesses both the F(c) region, recognized by high-affinity Fc receptor proteins, as well as the F(ab) region possessing the epitope-recognition site. Both the Heavy and Light chains of the antibody molecule are present. Secondary Antibodies are available in a variety of formats and conjugate types. When choosing a secondary antibody product, consideration must be given to species and immunoglobulin specificity, conjugate type, fragment and chain specificity, level of cross-reactivity, and host-species source and fragment composition.
<b>Synonyms:</b>	Donkey anti-Rabbit IgG DyLight™ 680 Conjugated Antibody, Donkey anti-Rabbit IgG Antibody DyLight™680 Conjugation
<b>Host Species:</b>	Donkey
<b>Specificity:</b>	IgG (H&L)
<b>Conjugate:</b>	DyLight™ 680
<b>Clonality:</b>	Polyclonal
<b>Format:</b>	IgG
<b>F/P Ratio:</b>	2.8

## Target Details

<b>Reactivity:</b>	Rabbit
<b>Immunogen:</b>	Rabbit IgG whole molecule
<b>Purity/Specificity:</b>	This product was prepared from monospecific antiserum by immunoaffinity chromatography using Rabbit IgG coupled to agarose beads followed by conjugation to fluorochrome and extensive dialysis against the buffer stated above. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-Donkey Serum, Rabbit IgG and Rabbit Serum. This antibody will react with heavy chains of Rabbit IgG and with light chains of most Rabbit immunoglobulins.

## Application Details

<b>Tested Applications:</b>	Dot Blot
<b>Suggested Applications:</b>	WB (Based on references)
<b>Application Note:</b>	Anti-Rabbit IgG (H&L) DyLight 680 Antibody has been tested by dot blot and is designed for immunofluorescence microscopy, fluorescence based plate assays (FLISA) and fluorescent western blotting. This product is also suitable for multiplex analysis, including multicolor imaging, utilizing various commercial platforms. The emission spectra for this DyLight™ conjugate match the principle output wavelengths of most common fluorescence instrumentation.
<b>Assay Dilutions:</b>	All assays should be optimized by the user. Recommended dilutions (if any) may be listed below.
<b>FLISA:</b>	1:20,000
<b>IF:</b>	1:5,000
<b>WB:</b>	1:10,000

## Formulation

<b>Physical State:</b>	Lyophilized
<b>Concentration:</b>	1 mg/ml by UV absorbance at 280 nm
<b>Buffer:</b>	0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2
<b>Preservative:</b>	0.01% (w/v) Sodium Azide
<b>Stabilizer:</b>	10 mg/mL Bovine Serum Albumin (BSA) - Immunoglobulin and Protease free
<b>Reconstitution Volume:</b>	100 µL

**Reconstitution Buffer:** Restore with deionized water (or equivalent)

---

## Shipping & Handling

**Shipping Condition:** Ambient

---

**Storage Condition:** Store vial at 4° C prior to restoration. For extended storage aliquot contents and freeze at -20° C or below. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted liquid. Dilute only prior to immediate use.

---

**Expiration:** Expiration date is one (1) year from date of receipt.

---
