#### Datasheet for 706-105-002

# F(ab')2 Guinea Pig IgG (H&L) Antibody Alkaline Phosphatase Conjugated

#### **Overview**

Description:	Goat F(ab')2 Anti-Guinea Pig IgG (H&L) Antibody Alkaline Phosphatase Conjugated - 706-105-002
Item No.:	706-105-002
Size:	500 μg
Reactivity:	Guinea Pig
<b>Host Species:</b>	Goat

#### **Product Details**

Background:	F(ab')2 Anti-Guinea Pig IgG Alkaline Phosphatase antibody was generated by enzymatic cleavage and subsequent separation from the Fc fragment. Because of their smaller size, F(ab)2 fragments offer several advantages over intact antibodies for use in certain immunochemical techniques and experimental applications. F(ab)2 fragments penetrate tissue samples and show better antigen recognition and signal generation in IHC. F(ab)2 fragments lack the Fc region and therefore do not bind Fc receptors which effectively lowers background staining. F(ab')2 Antibody is ideal for investigators who routinely perform flow cytometry, immunohistochemistry or IHC and other immunoassays.
Synonyms:	Goat F(ab')2 Anti-Guinea Pig IgG Antibody Alkaline Phosphatase Conjugation, Goat Fab2 Anti-Guinea Pig IgG alk phos Conjugated Antibody
<b>Host Species:</b>	Goat
Specificity:	IgG (H&L)
Conjugate:	Alkaline Phosphatase (AP)
Clonality:	Polyclonal
Format:	IgG F(ab')2

## **Target Details**

Reactivity:	Guinea Pig
Immunogen:	Guinea Pig IgG whole molecule

**Purity/Specificity:** This product was prepared from monospecific antiserum by immunoaffinity chromatography

using Guinea Pig IgG coupled to agarose beads followed by pepsin digestion and

chromatographic separation. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-Alkaline Phosphatase, anti-Goat Serum, Guinea Pig IgG and Guinea Pig Serum.

No reaction was observed against anti-Pepsin or anti-Goat IgG F(c).

#### **Application Details**

Application Note: Suitable for immunomicroscopy and flow cytometry or FACS analysis as well as other antibody based fluorescent assays requiring lot-to-lot consistency. This product has been assayed against

1.0 μg of Guinea pig IgG in a standard capture ELISA using pNPP p-nitrophenyl phosphate code # NPP-10 as a substrate for 30 minutes at room temperature. A working dilution of 1:4,000 to

1:20,000 of the reconstitution concentration is suggested for this product.

Assay Dilutions: All assays should be optimized by the user. Recommended dilutions (if any) may be

listed below.

**ELISA:** 1:2,000 - 1:10,000

**IHC:** 1:200 - 1:1,000

**WB:** 1:500 - 1:2,500

#### **Formulation**

**Physical State:** Liquid (sterile filtered)

**Concentration:** 1.0 mg/mL by UV absorbance at 280 nm

**Buffer:** 0.05 M Tris Chloride, 0.15M Sodium Chloride, 0.001M Magnesium Chloride, 0.0001M Zinc

Chloride, 50% (v/v) Glycerol; pH 8.0

#### **Shipping & Handling**

Shipping Condition: Wet Ice

**Storage Condition:** Store vial at 4° C before opening. DO NOT FREEZE. This product is stable at 4° C as an

undiluted liquid. Dilute only prior to immediate use. Freezing alkaline phosphatase conjugates

will result in a substantial loss of enzymatic activity.

**Expiration:** Expiration date is one (1) year from date of receipt.
