Datasheet for 711-1903

F(ab')₂ Rabbit IgG Fc Antibody Texas Red™ Conjugated**Overview**

| | |
|----------------------|---------------------------------------------------------------------------------------|
| Description: | Goat F(ab') ₂ Anti-Rabbit IgG Fc Antibody Texas Red™ Conjugated - 711-1903 |
| Item No.: | 711-1903 |
| Size: | 1 mg |
| Applications: | Dot Blot |
| Reactivity: | Rabbit |
| Host Species: | Goat |

Product Details

| | |
|----------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Background: | F(ab') ₂ Anti-Rabbit IgG F(c) Texas Red Antibody was generated in goat and detects specifically Rabbit IgG F(c). Secondary Antibodies are available in a variety of formats and conjugate types. When choosing a secondary antibody product, consideration must be given to species and immunoglobulin specificity, conjugate type, fragment and chain specificity, level of cross-reactivity, and host-species source and fragment composition. |
| Synonyms: | Goat F(ab') ₂ Anti-Rabbit IgG F(c) Texas Red™ Conjugated Antibody, Goat Fab2 Anti-Rabbit IgG Fc Antibody Texas Red™ Conjugation |
| Host Species: | Goat |
| Specificity: | IgG Fc |
| Conjugate: | Texas Red® |
| Clonality: | Polyclonal |
| Format: | IgG F(ab') ₂ |
| F/P Ratio: | 4.0 |

Target Details

| | |
|--------------------|--------------------------|
| Reactivity: | Rabbit |
| Immunogen: | Rabbit IgG F(c) fragment |

| | |
|----------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Purity/Specificity: | This product was prepared from monospecific antiserum by immunoaffinity chromatography using Rabbit IgG coupled to agarose beads followed by solid phase adsorption(s) to remove any unwanted reactivities, pepsin digestion and chromatographic separation. Assay by immunoelectrophoresis resulted in a single precipitin arc against anti-Goat Serum, Rabbit IgG, Rabbit IgG F(c) and Rabbit Serum. No reaction was observed against anti-Pepsin, anti-Goat IgG F(c) or Rabbit IgG F(ab). |
|----------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

Application Details

| | |
|-----------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Tested Applications: | Dot Blot |
| Application Note: | F(ab') ₂ Anti-Rabbit IgG F(c) Texas Red Antibody has been tested by dot blot and is designed for immunofluorescence microscopy, fluorescence based plate assays (FLISA) and fluorescent western blotting. This product is also suitable for multiplex analysis, including multicolor imaging, utilizing various commercial platforms. |
| Assay Dilutions: | All assays should be optimized by the user. Recommended dilutions (if any) may be listed below. |
| FC: | 1:500 - 1:2,500 |
| FLISA: | 1:10,000 - 1:50,000 |
| IF: | 1:1,000 - 1:5,000 |

Formulation

| | |
|-------------------------------|------------------------------------------------------------------------|
| Physical State: | Lyophilized |
| Concentration: | 1 mg/mL by UV absorbance at 280 nm |
| Buffer: | 0.02 M Potassium Phosphate, 0.15 M Sodium Chloride, pH 7.2 |
| Preservative: | 0.01% (w/v) Sodium Azide |
| Stabilizer: | 10 mg/mL Bovine Serum Albumin (BSA) - Immunoglobulin and Protease free |
| Reconstitution Volume: | 1.0 mL |
| Reconstitution Buffer: | Restore with deionized water (or equivalent) |

Shipping & Handling

| | |
|----------------------------|---------|
| Shipping Condition: | Ambient |
|----------------------------|---------|

| | |
|---------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Storage Condition: | Store vial at 4° C prior to restoration. For extended storage aliquot contents and freeze at -20° C or below. Avoid cycles of freezing and thawing. Centrifuge product if not completely clear after standing at room temperature. This product is stable for several weeks at 4° C as an undiluted liquid. Dilute only prior to immediate use. |
| Expiration: | Expiration date is one (1) year from date of receipt. |

Images

Dot Blot

Dot Blot results of Goat F(ab')₂ Anti-Rabbit IgG F(c) Antibody Texas Red™ Conjugated. Dots are Rabbit F(c) at (1) 100ng, (2) 33.3ng, (3) 11.1ng, (4) 3.70ng, (5) 1.23ng. Blocking: MB-070 for 30 min at RT. Primary Antibody: Goat F(ab')₂ Anti-Rabbit IgG F(c) Antibody Texas Red™ at 1μg/mL for 1hr at RT. Secondary Antibody: none. Imaged with BioRad ChemiDoc, DL549 filter.

Disclaimer

This product is for research use only and is not intended for therapeutic or diagnostic applications. Please contact a technical service representative for more information. All products of animal origin manufactured by Rockland Immunochemicals are derived from starting materials of North American origin. Collection was performed in United States Department of Agriculture (USDA) inspected facilities and all materials have been inspected and certified to be free of disease and suitable for exportation. All properties listed are typical characteristics and are not specifications. All suggestions and data are offered in good faith but without guarantee as conditions and methods of use of our products are beyond our control. All claims must be made within 30 days following the date of delivery. The prospective user must determine the suitability of our materials before adopting them on a commercial scale. Suggested uses of our products are not recommendations to use our products in violation of any patent or as a license under any patent of Rockland Immunochemicals, Inc.
