# LDH-D (m2): 293T Lysate: sc-121318

## BACKGROUND

The lactate dehydrogenase family (LDH) consists of three members, designated LDH-A, LDH-B and LDH-C, all of which work in concert to catalyze the final step of anaerobic glycolysis, namely the conversion of L-lactate and NAD<sup>+</sup> to pyruvate and NADH. Each family member displays a specific tissue distribution pattern, with LDH-A present in muscle and LDH-B present in heart, while LDH-C expression is confined to testes and sperm. A fourth possible member, termed LDH-D (lactate dehydrogenase D), probable D-lactate dehydrogenase or DLD, is a 507 amino acid mitochondrial protein belonging to the D-isomer specific 2-hydroxyacid dehydrogenase family. Existing as two alternatively spliced isoforms, LDH-D is moderately expressed in liver and heart with lower levels found in kidney and skeletal muscle.

## CHROMOSOMAL LOCATION

Genetic locus: *Ldhd* (mouse) mapping to 8 E1.

## PRODUCT

LDH-D (m2): 293T Lysate represents a lysate of mouse LDH-D transfected 293T cells and is provided as 100 µg protein in 200 µl SDS-PAGE buffer.

## STORAGE

Store at -20° C. Repeated freezing and thawing should be minimized. Sample vial should be boiled once prior to use. Non-hazardous. No MSDS required.

## PROTOCOLS

See our web site at [www.scbt.com](http://www.scbt.com) for detailed protocols and support products.

## APPLICATIONS

LDH-D (m2): 293T Lysate is suitable as a Western Blotting positive control for mouse reactive LDH-D antibodies. Recommended use: 10-20 µl per lane.

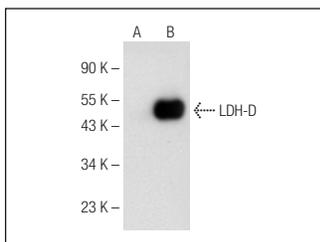

Control 293T Lysate: sc-117752 is available as a Western Blotting negative control lysate derived from non-transfected 293T cells.

LDH-D (G-8): sc-374127 is recommended as a positive control antibody for Western Blot analysis of enhanced mouse LDH-D expression in LDH-D transfected 293T cells (starting dilution 1:100, dilution range 1:100-1:1,000).

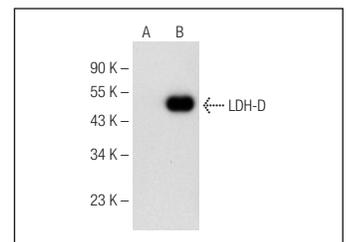

## RECOMMENDED SUPPORT REAGENTS

To ensure optimal results, the following support reagents are recommended:  
 1) Western Blotting: use m-IgGκ BP-HRP: sc-516102 or m-IgGκ BP-HRP (Cruz Marker): sc-516102-CM (dilution range: 1:1000-1:10000), Cruz Marker™ Molecular Weight Standards: sc-2035, UltraCruz® Blocking Reagent: sc-516214 and Western Blotting Luminol Reagent: sc-2048.

## DATA

LDH-D (G-8): sc-374127. Western blot analysis of LDH-D expression in non-transfected: sc-117752 (A) and mouse LDH-D transfected: sc-121318 (B) 293T whole cell lysates.

LDH-D (H-10): sc-374128. Western blot analysis of LDH-D expression in non-transfected: sc-117752 (A) and mouse LDH-D transfected: sc-121318 (B) 293T whole cell lysates.

## RESEARCH USE

For research use only, not for use in diagnostic procedures.
