# LRP130 (m): 293T Lysate: sc-121398

## BACKGROUND

The leucine-rich (LRR) repeat is a 20-30 amino acid motif that forms a hydrophobic  $\alpha/\beta$  horseshoe fold, allowing it to accommodate several leucine residues within a tightly packed core. All LRR repeats contain a variable segment and a highly conserved segment, the latter of which accounts for 11 or 12 residues of the entire LRR motif. Leucine-rich protein (LRP130) is a cytoplasmic mRNA-binding protein likely to be involved in the processing of mitochondrial DNA transcripts. Defects in the LRPPRC gene that encodes LRP130 result in the French-Canadian type of Leigh syndrome, a severe neurological disorder characterized by lesions in the subcortical region of the brain. LRP130 also interacts with the low-affinity receptor for leukemia inhibitory factor to produce an intracellular signal cascade.

## CHROMOSOMAL LOCATION

Genetic locus: Lrpprc (mouse) mapping to 17 E4.

## PRODUCT

LRP130 (m): 293T Lysate represents a lysate of mouse LRP130 transfected 293T cells and is provided as 100  $\mu$ g protein in 200  $\mu$ l SDS-PAGE buffer.

## APPLICATIONS

LRP130 (m): 293T Lysate is suitable as a Western Blotting positive control for mouse reactive LRP130 antibodies. Recommended use: 10-20  $\mu$ l per lane.

Control 293T Lysate: sc-117752 is available as a Western Blotting negative control lysate derived from non-transfected 293T cells.

LRP130 (G-10): sc-166177 is recommended as a positive control antibody for Western Blot analysis of enhanced mouse LRP130 expression in LRP130 transfected 293T cells (starting dilution 1:100, dilution range 1:100-1:1,000).

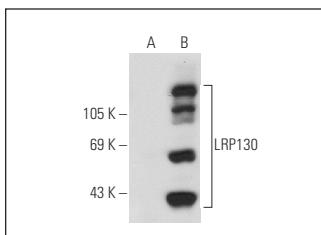

## RECOMMENDED SUPPORT REAGENTS

To ensure optimal results, the following support reagents are recommended:

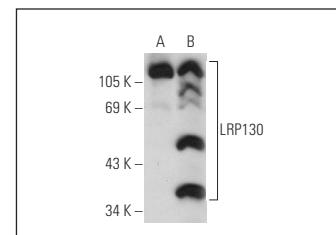

1) Western Blotting: use m-IgG $\kappa$  BP-HRP: sc-516102 or m-IgG $\kappa$  BP-HRP (Cruz Marker): sc-516102-CM (dilution range: 1:1000-1:10000), Cruz Marker™

Molecular Weight Standards: sc-2035, UltraCruz® Blocking Reagent: sc-516214 and Western Blotting Luminol Reagent: sc-2048.

## DATA

LRP130 (G-10): sc-166177. Western blot analysis of LRP130 expression in non-transfected: sc-117752 (**A**) and mouse LRP130 transfected: sc-121398 (**B**) 293T whole cell lysates.

LRP130 (F-7): sc-166178. Western blot analysis of LRP130 expression in non-transfected: sc-117752 (**A**) and mouse LRP130 transfected: sc-121398 (**B**) 293T whole cell lysates.

## STORAGE

Store at -20° C. Repeated freezing and thawing should be minimized. Sample vial should be boiled once prior to use. Non-hazardous. No MSDS required.

## RESEARCH USE

For research use only, not for use in diagnostic procedures.

## PROTOCOLS

See our web site at [www.scbt.com](http://www.scbt.com) for detailed protocols and support products.
