β -synuclein (8): sc-136452

BACKGROUND

The synucleins, including α -synuclein (also designated NACP for nonamyloid component precursor), β -synuclein (also designated PNP 14 for phospho-neuroprotein 14) and γ -synuclein (also designated persyn or BCSG1 for breast cancer-specific gene 1) are presynaptic proteins abundant in neurons. Synucleins are predominantly expressed in the brain and are speculated to be involved in synaptic regulation and neuronal plasticity. α -synuclein, identified as a component of Alzheimer's disease amyloid plaques, is localized to neuronal cell bodies and synapses. Coordinate expression of α -synuclein and β -synuclein may be important during hematopoietic cell differentiation. A mutant form of α -synuclein is found in patients with early onset Parkinson's disease. γ -synuclein is associated with axonal pathology in Parkinson's disease.

CHROMOSOMAL LOCATION

Genetic locus: SNCB (human) mapping to 5q35.2; Sncb (mouse) mapping to 13 B1.

SOURCE

β -synuclein (8) is a mouse monoclonal antibody raised against amino acids 107-118 of β -synuclein of rat origin.

PRODUCT

Each vial contains 200 μ g IgG₁ kappa light chain in 1.0 ml of PBS with < 0.1% sodium azide and 0.1% gelatin.

In addition, β -synuclein (8) is available conjugated to biotin (sc-136452 B), 200 μ g/ml, for WB, IHC(P) and ELISA.

APPLICATIONS

β -synuclein (8) is recommended for detection of β -synuclein of mouse, rat and human origin by Western Blotting (starting dilution 1:200, dilution range 1:100-1:1000) and immunoprecipitation [1-2 μ g per 100-500 μ g of total protein (1 ml of cell lysate)].

Suitable for use as control antibody for β -synuclein siRNA (h): sc-36594, β -synuclein siRNA (m): sc-36595, β -synuclein shRNA Plasmid (h): sc-36594-SH, β -synuclein shRNA Plasmid (m): sc-36595-SH, β -synuclein shRNA (h) Lentiviral Particles: sc-36594-V and β -synuclein shRNA (m) Lentiviral Particles: sc-36595-V.

Molecular Weight of β -synuclein: 19 kDa.

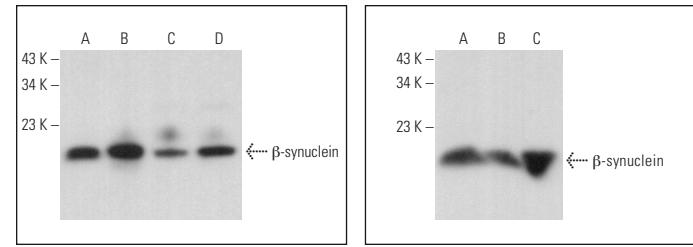

Positive Controls: rat brain extract: sc-2392, mouse brain extract: sc-2253 or rat cerebellum extract: sc-2398.

RECOMMENDED SUPPORT REAGENTS

To ensure optimal results, the following support reagents are recommended:

- 1) Western Blotting: use m-IgG₁ BP-HRP: sc-516102 or m-IgG₁ BP-HRP (Cruz Marker): sc-516102-CM (dilution range: 1:1000-1:10000), Cruz Marker™ Molecular Weight Standards: sc-2035, UltraCruz® Blocking Reagent: sc-516214 and Western Blotting Luminol Reagent: sc-2048. 2) Immunoprecipitation: use Protein A/G PLUS-Agarose: sc-2003 (0.5 ml agarose/2.0 ml).

DATA

β -synuclein (8): sc-136452. Western blot analysis of β -synuclein expression in mouse cerebellum (**A**), human cerebellum (**B**), human brain (**C**) and human cerebral cortex (**D**) tissue extracts.

β -synuclein (8): sc-136452. Western blot analysis of β -synuclein expression in rat brain (**A**), rat cerebellum (**B**) and mouse brain (**C**) tissue extracts.
