# Annexin XI (h): 293T Lysate: sc-170010

## BACKGROUND

The Annexin family of calcium-binding proteins is composed of at least ten mammalian genes. It is characterized by a conserved core domain, which binds to phospholipids in a  $\text{Ca}^{2+}$ -dependent manner, and a unique amino terminal region, which may confer binding specificity. The Annexin family has been implicated as regulators of such diverse processes as ion-flux, endocytosis and exocytosis, and cellular adhesion. Two forms of Annexin XI, designated A and B, have been identified. Transfection of COS-7 cells with Annexin XI-A, but not Annexin XI-B, causes formation of Annexin XI-associated vesicles.

## CHROMOSOMAL LOCATION

Genetic locus: ANXA11 (human) mapping to 10q22.3.

## PRODUCT

Annexin XI (h): 293T Lysate represents a lysate of human Annexin XI transfected 293T cells and is provided as 100  $\mu\text{g}$  protein in 200  $\mu\text{l}$  SDS-PAGE buffer.

## APPLICATIONS

Annexin XI (h): 293T Lysate is suitable as a Western Blotting positive control for human reactive Annexin XI antibodies. Recommended use: 10-20  $\mu\text{l}$  per lane.

Control 293T Lysate: sc-117752 is available as a Western Blotting negative control lysate derived from non-transfected 293T cells.

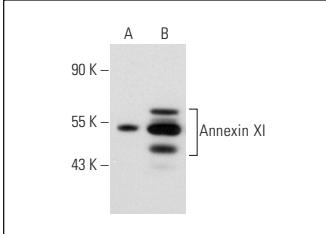

Annexin XI (A-12): sc-55494 is recommended as a positive control antibody for Western Blot analysis of enhanced human Annexin XI expression in Annexin XI transfected 293T cells (starting dilution 1:100, dilution range 1:100-1:1,000).

## RECOMMENDED SUPPORT REAGENTS

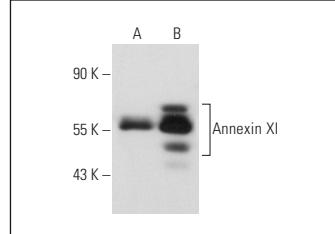

To ensure optimal results, the following support reagents are recommended:

- Western Blotting: use m-IgG $\kappa$  BP-HRP: sc-516102 or m-IgG $\kappa$  BP-HRP (Cruz Marker): sc-516102-CM (dilution range: 1:1000-1:10000), Cruz Marker™ Molecular Weight Standards: sc-2035, UltraCruz® Blocking Reagent: sc-516214 and Western Blotting Luminol Reagent: sc-2048.

## DATA

Annexin XI (A-12): sc-55494. Western blot analysis of Annexin XI expression in non-transfected: sc-117752 (**A**) and human Annexin XI transfected: sc-170010 (**B**) 293T whole cell lysates.

Annexin XI (D-12): sc-46686. Western blot analysis of Annexin XI expression in non-transfected: sc-117752 (**A**) and human Annexin XI transfected: sc-170010 (**B**) 293T whole cell lysates.

## STORAGE

Store at -20° C. Repeated freezing and thawing should be minimized. Sample vial should be boiled once prior to use. Non-hazardous. No MSDS required.

## RESEARCH USE

For research use only, not for use in diagnostic procedures.

## PROTOCOLS

See our web site at [www.scbt.com](http://www.scbt.com) for detailed protocols and support products.
