# ZR-75-1 Cell Lysate: sc-2241

## BACKGROUND

Santa Cruz Biotechnology offers a variety of whole cell lysates for use in combination with our antibodies as Western Blotting controls. ZR-75-1 Whole Cell Lysate is derived from the ZR-75-1 cell line using a procedure that ensures protein integrity and lot-to-lot reproducibility. All lysates are tested by Western Blotting to assure that each one contains the expected concentration and assortment of proteins. Numerous antibodies directed against a wide array of mammalian proteins are used to test each lysate.

ZR-75-1 cell line was established from a 63 year old female Caucasian. The cells produce high levels of MUC-1 Mucin mRNA and low levels of MUC-2 mRNA but do not express the MUC-3 gene. The estrogen receptor is also expressed. This human cell line has a hypertriploid chromosome number.

## STORAGE

Store at -20° C; stable for one year from the date of shipment. Non-hazardous. No MSDS required. Minimize repeated freezing and thawing.

## PROTOCOLS

See our web site at [www.scbt.com](http://www.scbt.com) or our catalog for detailed protocols and support products.

## SOURCE

ZR-75-1 Whole Cell Lysate is derived from the ZR-75-1 cell line.

Organism:	<i>Homo sapiens</i> (human)
Organ:	Mammary gland; breast
Tissue:	Duct
Disease:	Ductal carcinoma
Derived from metastatic site:	Ascites
Growth Properties:	Adherent epithelial

## PRODUCT

Each vial contains 500  $\mu$ g protein in 200  $\mu$ l of an SDS-PAGE Western Blotting buffer, which consists of 100  $\mu$ l RIPA Lysis Buffer and 100  $\mu$ l Electrophoresis Buffer, 2X.

## APPLICATIONS

ZR-75-1 Whole Cell Lysate is provided as a Western Blotting positive control. Recommended use is 50  $\mu$ g (20  $\mu$ l) per lane. Sample vial should be boiled once prior to use.

## PREPARATION METHOD

Cells are cultured with appropriate media conditions and allowed to reach a confluence of 75%. Cells are lysed using the RIPA Lysis Buffer System (sc-24948). The BCA Protein Assay Kit (sc-202389) is used to determine the total protein concentration. The lysate is adjusted to contain 500  $\mu$ g of total cellular protein in 100  $\mu$ l before adding an equal volume of Electrophoresis Sample Buffer, 2X (sc-24945). Final concentration of product is 500  $\mu$ g total protein in a final volume of 200  $\mu$ l.
