Cytokeratin 19; Clone A53-B/A2.26 (Ready-To-Use)

Availability/C	contents:	<u>Item #</u> A00122-0002 A00122-0007 A00122-0025	<u>Volume</u> 2 ml 7 ml 25 ml	
Description:				
Specie	es:	Mouse		
Immur	nogen:	Human breast cancer MCF-7 cells were used as the immunogen for the Cytokeratin 19 antibody.		
Clone	:	A53-B/A2.26 (Ks 19.1)		
Isotyp	e:	Mouse IgG2a, Kappa		
Forma	ıt:	This antibody has been pretitered and quality controlled to work on formalin-fixed paraffin- embedded as well as acetone fixed cryostat tissue sections. No further titration is required.		
Specif	icity:	This antibody reacts with the rod domain of human Cytokeratin 19, a polypeptide of 40kDa. The antibody recognition epitope maps between amino acid 312-335. This antibody reacts with the MCF-7 cells which are known to contain Cytokeratin 19.		
Backg	round:	Cytokeratin 19 (CK19) is characterized of the ker in a defined zone of bas observed in sweat gland gastrointestinal tract, bla Cytokeratin 19 has been peripheral blood, bone r Cytokeratin 19 may be of This antibody reacts wit The antibody recognition the MCF-7 cells which a lacking Cytokeratin 19 s hepatocytes, therefore a metastasis.	s a type I intermediate filament protein and one of the best atins expressed in mature striated muscle. Cytokeratin 19 is expressed cal keratinocytes in the deep outer root sheath of hair follicles. Also d and mammary gland ductal and secretory cells, bile ducts, adder urothelium, oral epithelia, esophagus, ectocervical epithelium. In used as a useful marker for detection of tumor cells in lymph nodes, marrow and breast cancer. Immunohistochemical data has shown that useful as a marker for human skin stem cells. In the rod domain of human Cytokeratin 19, a polypeptide of 40kDa. In epitope maps between amino acid 312-335. This antibody reacts with are known to contain Cytokeratin 19. It shows no reaction with the cells such as A431 and HeLa. Cytokeratin 19 is not expressed in antibody to Cytokeratin 19 is useful in the identification of liver	
Specie Positiv Cellula Titer/V Microb	es Reactivity: ve Control: ar Localization: Vorking Dilution: biological State:	Human. Reacts weakly Skin, Breast carcinoma, Cytoplasmic. No further dilution is req This product is not steril	with mouse, rat and guinea pig Cytokeratin 19. Colon carcinoma, Thyroid. Juired. le.	

Storage: 2° C

P.O. Box 3286 - Logan, Utah 84323, U.S.A. - Tel. (800) 729-8350 - Tel. (435) 755-9848 - Fax (435) 755-0015 - www.scytek.com

Uses/Limitations:

Not to be taken internally. For Research Use Only. This product is intended for qualitative immunohistochemistry with normal and neoplastic formalin-fixed, paraffin-embedded tissue sections, to be viewed by light microscopy. Do not use if reagent becomes cloudy. Do not use past expiration date. Use caution when handling reagents. Non-Sterile.

Ordering Information and Current Pricing at www.scytek.com

Procedure:

- 1. **Tissue Section Pretreatment <u>RECOMMENDED</u>**: Staining of formalin fixed, paraffin embedded tissue sections is enhanced by pretreatment with Citrate Plus (10X) HIER Solution (ScyTek catalog# CPL500).
- Primary Antibody Incubation Time: We suggest an incubation period of 30 minutes at room temperature. However, depending upon the fixation conditions and the staining system employed, optimal incubation should be determined by the user.
- 3. **Visualization:** For maximum staining intensity we recommend the "UltraTek HRP Anti-Polyvalent Lab Pack" (ScyTek catalog# UHP125, see IFU for instructions) combined with the "DAB Chromogen/Substrate Bulk Pack (High Contrast)" (ScyTek catalog# ACV500, see IFU for instructions).

Precautions: Contains Sodium Azide as a preservative (0.09% w/v). Do not pipette by mouth. Avoid contact of reagents and specimens with skin and mucous membranes. Avoid microbial contamination of reagents or increased nonspecific staining may occur. This product contains no hazardous material at a <u>reportable concentration</u> according to U.S. 29 CFR 1910.1200, OSHA Hazardous Communication Standard and EC Directive 91/155/EC.

Warranty:

No products or "Instructions For Use (IFU)" are to be construed as a recommendation for use in violation of any patents. We make no representations, warranties or assurances as to the accuracy or completeness of information provided on our IFU or website. Our warranty is limited to the actual price paid for the product. ScyTek Laboratories, Inc. is not liable for any property damage, personal injury, time or effort or economic loss caused by our products. Immunohistochemistry is a complex technique involving both histological and immunological detection methods. Tissue processing and handling prior to immunostaining can cause inconsistent results. Variations in fixation and embedding or the inherent nature of the tissue specimen may cause variations in results. Endogenous peroxidase activity or pseudoperoxidase activity in erythrocytes and endogenous biotin may cause non-specific staining depending on detection system used.
