GFP Tag Immunoprecipitation Kit

Chemical Properties

CAS No. :

Formula:

Molecular Weight:

Appearance: no data available

Storage: store at 4°C

Biological Description

Description	TargetMol's GFP Tag Immunomagnetic Beads specifically bind to proteins with the GFP tag, which can be used for immunoprecipitation (IP) of proteins, protein complexes, protein-nucleic acid complexes, and other antigens. The GFP Tag Immunoprecipitation Kit comes with prepared buffers to provide a relatively better condition for immunoprecipitation and to enhance the stability. This product is suitable for antigen samples from cell lysates, cell culture supernatants, serum, ascites, etc.
