Biological Description

Description	Alvelestat (AZD9668) is an orally bioavailable, selective and reversible inhibitor of human neutrophil elastase (NE), with potential anti-inflammatory activity.
Targets(IC50)	Others,Serine Protease
In vitro	In a mouse model of (smoke)-induced airway inflammation, AZD9668 significantly reduced the number of (neutrophils) in the bronchoalveolar lavage (BAL) and the level of BAL IL-1 β . Oral administration of AZD9668 in both mice and rats was able to inhibit (NE)-induced lung injury.
In vivo	In whole blood stimulated by yeast polysaccharide, AZD9668 effectively inhibits NE (NE) activity in the supernatant of antigen-challenged cells and on the surface of stimulated polymorphonuclear cells.
