Biological Description

Description	α -Dendrotoxin (α -DTX) is a small molecular peptide neurotoxin isolated from the venom of the African green mamba snake (<i>Dendroaspis angusticeps</i>). This compound acts as a blocker for KV1.1, KV1.2, KV1.6, and ASIC channels. By inhibiting potassium channels, α -Dendrotoxin reduces the threshold for neuronal action potentials and increases the frequency of these potentials, thereby enhancing neuronal excitability. It is utilized in neurotoxicological research.
