## vMIP-II (1-21) TFA

## Chemical Properties

CAS No. :

Formula:

Molecular Weight:

Appearance: no data available

Storage: Powder: -20°C for 3 years | In solvent: -80°C for 1 year

## Biological Description

|               |                                                                                                                                                                                                                                                                           |

| Description   | vMIP-II (1-21) (NT21MP) TFA (TFA is a potent inhibitor of CXCR4. This compound interacts broadly with CC and CXC chemokine receptors. Furthermore, vMIP-II (1-21) TFA inhibits CXCR4 by competing for binding sites with 125I-SDF-1R, exhibiting an IC50 value of 190 nM. |
| Targets(IC50) | CXCR                                                                                                                                                                                                                                                                      |
