[Product Images](#)

Short Description

The lectin has specificity toward α -linked mannose-containing oligosaccharides, with an *N*-acetylchitobiose-linked α -fucose residue included in the receptor sequence.

Biotinylated *Pisum sativum* agglutinin has an appropriate number of biotins bound to provide the optimum staining characteristics for this lectin. This conjugate is supplied essentially free of unconjugated biotins and is preserved with sodium azide.
