# TRI Reagent®

RNA/DNA/Protein Isolation Reagent

## Replacement Cat. Nos.

R2050-1-50 (50 ml)  
R2050-1-200 (200 ml)

**Storage:** Store at 4–25°C

**ZYMO RESEARCH**

*The Beauty of Science is to Make Things Simple*

## Product Information

### Description:

TRI Reagent® is a complete and ready-to-use reagent for the isolation of total RNA or the simultaneous isolation of RNA, DNA and proteins from samples of human, animal, plant, yeast, bacterial and viral origin.

TRI Reagent® combines phenol and guanidine thiocyanate in a mono-phase solution to facilitate the immediate and most effective inhibition of RNase activity.

TRI Reagent® is compatible with **Direct-zol™ RNA** purification products from Zymo Research and is supplied together with the Direct-zol™ RNA MiniPrep (R2051, R2053), Direct-zol™ RNA MicroPrep (R2061, R2063), Direct-zol™ RNA MiniPrep Plus (R2071, R2073), Direct-zol™-96 RNA (R2055, R2057) and Direct-zol™-96 MagBead RNA (R2101, R2103, R2105).

### Usage:

For RNA purification directly from TRI Reagent® refer to the **Direct-zol™ RNA** product manuals (R2050, R2051, R2052, R2053, R2054, R2055, R2056, R2057, R2060, R2061, R2062, R2063, R2070, R2071, R2072, R2073, R2100, R2101, R2102, R2103), available at <http://www.zymoresearch.com/direct-zol>.

For DNA, protein and other RNA isolation protocols, consult MRC related literature found at <http://www.mrcgene.com>.

### Stability:

TRI Reagent® is stable at 25°C for at least two years from the date of purchase (1).

### Special Handling Precautions:

TRI Reagent® contains a poison (phenol) and an irritant (guanidine thiocyanate). Causes burns. CAN BE FATAL. When working with TRI Reagent® use gloves and eye protection (shield, safety goggles). Do not get on skin or clothing. Avoid breathing vapor. Read the warning note on the bottle and MSDS. In case of contact: Immediately flush eyes or skin with a large amount of water for at least 15 min and seek immediate medical attention.
