Axygen® Gel Documentation Systems

Axygen® Gel Documentation systems easily capture publication quality, 16 bit TIFF images. The systems are quick to set up and have an intuitive user interface for image capture, annotation, and contrast adjustment. Images are easily saved and opened in common gel analysis software for more detailed analysis.

- Auto exposure—you never have to manually manipulate the camera
- Ready-to-use—just connect the computer* and load the software
- Long-life dual wavelength transilluminators
- Exceptionally high resolution (5.4 MP) camera
- The cabinet is compact with an ultra-violet (UV) cut-off switch to prevent exposure to UV light if the cabinet door is opened while the UV light is on.

Choose from Two Axygen Gel Documentation Systems

The Axygen Gel Documentation System is an ideal system for labs that want good value without compromising ease of use or image quality. It includes a dual-wavelength transilluminator, 5.4 MP image resolution camera, and image acquisition software.

The Axygen Gel Documentation System-BL has all the features of the standard Axygen Gel Documentation system, as well as built-in blue lights and a built-on Microsoft® Windows® tablet. The blue lights are designed for use with EtBr replacement dyes to prevent damage to DNA that will be excised for subsequent analysis.

Features

- Darkroom tab lets you select from UV 302, UV 365, Epi White, or Epi Blue (BL system only) light sources, as well as an optional Trans White light illumination tray.
- Auto Exposure tool calculates the optimal exposure time with just a single click. You can also use the Slider tool to manually adjust the exposure time and view an updated live image.
- Select ROI tool allows you to select a region of interest. The Auto Exposure calculations are only based on the selected region. This feature is especially useful for gels that have either intense or faint bands.
- Band Excision tool allows you to temporarily override the safety precautions in the system to view the gel with the lights on.**
- Imaging tools include crop, rotate, resize, contrast, saturation, and zoom. Annotation tools include a variety of text and drawing tools. Finished images can be saved, printed, emailed, or exported for further analysis.
- Transillumination bulbs last for 30,000 hours—which equals over 3.5 years if the bulbs were in continuous use.

* BL model includes tablet computer with software already included.
** Always wear protective eyewear when working with UV light.

Axygen® Horizontal Gel Boxes

Axygen horizontal gel boxes are high quality, full featured units designed for exceptional durability and efficiency. The gel boxes feature leak-free external gel casting, which allows you to cast one gel outside of the box while another gel is running inside. The units are available in four different sizes, and each unit comes with two sizes of gel trays. In addition, they have easy to replace electrodes that are recessed to reduce potential damage. These gel boxes are an excellent value that will provide years of reliable service.

Features
- Flexibility – each unit comes with 2 sizes of gel trays to optimize applications.
- External gel casting to gel box allows for running gels while casting the next one.
- Ease of use – the Axygen contrast enhancer makes loading gels easier.
- Rugged injection molding is supported by a 3-year warranty.
- Larger units come with recirculation ports allowing for buffer exchange.
Axygen® Horizontal Gel Boxes

Four sizes of horizontal tanks. Each comes with 2 sizes of gel trays which allow for external gel casting. Three larger sizes come with recirculation ports for use as needed.

### HGB-7
- **Tray sizes:** 7 x 7 cm, 7 x 10 cm
- **Recirculation ports:** No
- **Combs:** 2 x 8 well, 1.5 mm thickness

### HGB-10
- **Tray sizes:** 10 x 10 cm, 10 x 12 cm
- **Recirculation ports:** Yes
- **Combs:** 2 x 10 multi-channel compatible well, 1.5 mm thickness

### HGB-15
- **Tray sizes:** 15 x 10 cm, 15 x 15 cm
- **Recirculation ports:** Yes
- **Combs:** 1 x 16 multi-channel compatible well, 1.5 mm thickness, 1 x 20 well, 1.5 mm thickness

### HGB-20
- **Tray sizes:** 20 x 20 cm, 20 x 25 cm
- **Recirculation ports:** Yes
- **Combs:** 2 x 20 multi-channel compatible well, 1.5 mm thickness, 2 x 40 multi-channel compatible well, 1.5 mm thickness

Axygen® MaxyGene II Thermal Cycler

The Axygen MaxyGene II Thermal Cycler brings increased speed and advanced features, providing the premium performance you have come to expect from Axygen brand products.

Features

- Unique flexible programming
- Rapid run times
- Improved workflow over traditional gradient cyclers
- Ramping rates up to 5°C/sec.
- Simple user interface
- Adjustable heated lid accommodates strips, tubes, and microplates
- Pre-programmed standard protocols
- 3-year warranty

Simplified Workflow for Improved Throughput

The Axygen MaxyGene II Thermal Cycler is extremely simple to program, compact in design, and built to perform (Figure 1). It makes method optimization affordable and provides consistent, reliable results. Precision Thermal Control provides rapid heating and cooling of the precision-machined sample block by six independently temperature-controlled Peltier modules. A sophisticated algorithm program calculates sample temperature and triggers heating and cooling accordingly, minimizing over- and under-shooting.

The MaxyGene II Thermal Cycler may be programmed to operate between one and six different annealing temperatures across the block (Figure 2). This thermal cycler provides improved throughput by reducing time and simplifies workflow by reducing steps.

Figure 1. MaxyGene Thermal Cycler Screen

Figure 2. Primers designed to anneal to various genes (e.g., Gene A, B, and C) typically have different annealing temperatures ($T_1$, $T_2$, and $T_3$). The Axygen MaxyGene II can perform up to six different reactions, significantly reducing steps and time.
A variety of applications can be performed with the Axygen® MaxyGene II, from single temperature soaks to sophisticated multi-step programs. All of these are easily set up. The time or temperature of a cycling step can be automatically increased or decreased during successive cycles. This is useful for “touchdown” applications and for extending annealing times as enzyme is depleted. Programs may also be paused while running. During operation, actual times and temperatures are displayed. Estimated run times are automatically calculated, and a log of the last run can be displayed or downloaded to a printer or PC.

Axygen® PlateMax® Semi-automatic Plate Sealer

**Compact Footprint**

The Axygen PlateMax semi-automatic plate sealer is ideal for the low to medium throughput laboratory that requires uniform and consistent sealing of microplates. Sealing parameters are set and displayed via the user-friendly control panel and the sealing operation is automated to ensure consistent results.

**Intuitive Layout**

The PlateMax sealer control system features an intuitive layout with settings for all types of plates and sealing materials. The Mode button selects sealing time or temperature, and the control knob adjusts the setting.

Temperature can be precisely set in increments of 1°C and time in increments of 0.1 seconds. The PlateMax has a power saving option that turns the heater off if not in use. For those labs that choose to turn this function off, you can have the PlateMax ready to run all day.

- Accepts a wide range of microplates and heat seals
- User-friendly control system
- Large digital display shows all operating parameters
- Adjustable sealing temperature
- Precise temperature, timing, and pressure for consistent sealing

**Simple 3-step Operation**

1. Set time and temperature.
2. Place a microplate in the open drawer.
3. Place a heat seal on top of the plate and press the “SEAL” button.

**Versatile and Convenient**

The PlateMax sealer accepts a wide variety of plate types and heights. An aluminum adapter is used for PCR and standard assay plates. The motorized heated platen automatically adjusts for different plate heights and provides uniform pressure to ensure a quality seal. The platen incorporates a special non-stick coating. The side access door allows for easy cleaning.

**Safe**

The internal heating elements are situated inside the instrument casing and an internal safety door prevents access to the heated area. In addition, the motorized drawer features safety switches. If a hand or object obstructs the closing drawer, the drawer motor will reverse. This feature protects both the user and the instrument.

The Axygen Axyspin refrigerated microcentrifuge is a high performance refrigerated microcentrifuge designed to quickly process samples for applications such as nucleic acid and protein preparation, purifications, extractions, and pelleting.

- Powerful refrigeration system cools to 4°C in 8 minutes
- 24 x 1.5/2.0 mL aluminum rotor included
- Exceptionally quiet and compact

### Axygen Axyspin Refrigerated Microcentrifuge

The Axygen Axyspin refrigerated microcentrifuge combines a powerful yet silent, brushless drive with an efficient cooling system, all in a compact footprint. Brushless drive technology has been fine-tuned in the Axyspin refrigerated microcentrifuge to deliver fast acceleration and deceleration of the solid aluminum rotor. The uniquely designed 24-place rotor allows easy access to the tops of sample tubes. Starting from room temperature, the chamber of the Axyspin refrigerated microcentrifuge cools to 4°C in just 8 minutes. The control panel features a backlit LCD display, which allows users to easily view running parameters while the large control knob facilitates digital setting of rotor speed, run time, and temperature. These high performance features allow for faster sample processing and less down time.

The rotor of the Axyspin refrigerated microcentrifuge can accommodate 1.5 and 2.0 mL Axygen microcentrifuge tubes, including the most popular catalog numbers (MCT-150-C and MCT-200-C).

Axygen® Axypet® Single- and Multi-channel Pipettors

Axygen Axypet pipettors combine high levels of accuracy and precision with design innovations to make pipetting more comfortable during prolonged periods of time.

- Thumb-friendly soft spring pipetting system reduces fatigue
- Unique side EZIject button option reduces thumb movement*
- Finger-hook provides for a more relaxed grip
- Large ergonomic push button is easy on the thumb during contact
- Locking feature prevents accidental volume changes during pipetting procedures

Additional multi-channel pipettor features:
- Push button and ejector button are ergonomically located
- Curved ejector bar allows tips to be ejected in steps, reducing the amount of force required for ejection
- Tip manifold rotates 360°*
- Each channel of the pipettor has an individual, precision piston assembly to ensure accuracy and reproducibility from one pipetting series to the next
- Shafts withdraw when pressed against a row of tips
- Each shaft moves independently, minimizing jamming of tips
- Micrometer is continuously adjustable for selection of whole or fractional volumes

The Axygen Axypet 16-channel pipettor features a comfortable, lightweight design to help reduce hand fatigue, as well as an ergonomically designed ejector lever. Each channel of the pipettor has an individual piston assembly to ensure accuracy and precision when working at micro-volume levels. The tip holder allows for effortless and leak-free tip mounting, while the micrometer is continuously adjustable for selection of whole or fractional volumes.

**Axypet 16-channel pipettor features:**
- Compatible with 384-well microplates
- Ambidextrous design
- One-hand volume setting
- Color-coded volume controls for quick and easy selection
- Fully autoclavable pipettor body (except volume control)
- Tip manifold rotates 360°

*Minimum volume is 0.5 μL.

**Compatible Axygen Pipet Tips**

These polypropylene tips are RNase-/DNase-free and nonpyrogenic. Flexible walls and internal sealing rings ensure a secure fit with less force required to load and eject. Exclusive Axygen Maxymum Recovery® technology provides ultra-low retention and high yield.

Axygen® MotoPet® Pipet Controller

Axygen MotoPet is a precise, motor powered, rechargeable pipet controller for volumes ranging from 0.5 mL to 100 mL. The unit has an ergonomic design and a highly efficient motor for fast aspiration and dispense of samples as large as 100 mL and full control and precision while dispensing volumes as small as 0.5 mL. It is compatible with both glass and plastic pipets.

Features

- Molded, lightweight handle for effortless pipetting even during extended use.
- Easily accessible switches allow you to choose the optimal operation mode depending on the volume and viscosity of the sample.
- PTFE filter prevents liquid from entering the unit.
