## Anti-Metarhodopsin-I [K42-IL] Standard Size Ab00394-1.1

---

**Isotype and Format:** Mouse IgG1, Kappa

**Clone Number:** K42-IL

**Alternative Name(s) of Target:**

**UniProt Accession Number of Target Protein:** P02699

**Published Application(s):** ELISA

**Published Species Reactivity:** Bovine

**Immunogen:** Bovine rod cell disc membranes.

**Specificity:** The antibody binds specifically to the C3-loop of metarhodopsin-I with a Kd of 2.8 nM, the epitope being TGALQERSK.

**Application Notes:** This antibody specifically binds to the C3-loop of metarhodopsin-I, which is in equilibrium with the meta-active metarhodopsin II. The antibody stabilises the inactive metarhodopsin-I, inhibiting G-protein activation.

**Antibody First Published in:** Adamus et al. Use of peptides to select for anti-rhodopsin antibodies with desired amino acid sequence specificities. Peptide Research 1988; 1(1):42-47 [PMID:2485225](#)

**Note on publication:** Describes the generation of several monoclonal antibodies against rhodopsin using peptides for hybridoma selection.

### Product Form

**Size:** 200 µg Purified antibody.

**Purification:** Protein A affinity purified

**Supplied In:** PBS with 0.02% Proclin 300.

**Storage Recommendation:** Store at 4°C for up to 3 months. For longer storage, aliquot and store at -20°C.

**Concentration:** 1 mg/ml.

Important note - This product is for research use only. It is not intended for use in therapeutic or diagnostic procedures for humans or animals.
