Anti-alpha-gal epitope [m86] Bulk Size Ab00532-15.0-BT

This chimeric human antibody was made using the variable domain sequences of the original Mouse IgM format, for improved compatibility with existing reagents, assays and techniques.

Isotype and Format: Human IgM, Kappa

Clone Number: m86

Alternative Name(s) of Target: Gal-alpha-1 - 3Gal-beta-1 - 4GlcNAc-R

UniProt Accession Number of Target Protein:

Published Application(s): ELISA, FC

Published Species Reactivity: Species independent

Immunogen: Rabbit red cells, on which α -gal is the major carbohydrate epitope, were injected into alpha 1,3 galactosyltransferase knock-out mice.

Specificity: This antibody binds to the alpha-gal epitope on glycoproteins and glycolipids.

Application Notes: This antibody binds to the alpha-gal epitope found on many glycoproteins and glycolipids of non-primate mammals, prosimians and New World monkeys. Antibodies against the alpha-gal epitopes occur naturally in Old World monkeys, apes and humans, and induce xenograft rejection from non-primate animals.

Antibody First Published in: Chen, Radic and Galili Genes coding evolutionary novel anti-carbohydrate antibodies: studies on anti-Gal production in alpha 1,3 galactosyltransferase knock out mice. Mol Immunol. 2000 Jun;37(8):455-66. [PMID:11090880](#)

Note on publication: Describes the generation and characterization of anti-gal epitope antibodies raised in alpha 1,3 galactosyltransferase knock-out mice.

Product Form

Size: 500 µg Purified antibody in bulk size.

Purification: Affinity Purified using a recombinant lectin column

Supplied In: PBS only.

Storage Recommendation: Store at 4°C for up to 3 months. Note, this antibody is provided without added preservatives, it is therefore recommended this antibody be handled under sterile conditions. For longer storage, aliquot and store at -20°C.

Concentration: 1 mg /ml.

Important note - This product is for research use only. It is not intended for use in therapeutic or diagnostic

procedures for humans or animals.
