Anti-MHC II [OX-6] Bulk Size Ab00543-2.0-BT

This reformatted mouse antibody was made using the variable domain sequences of the original Mouse IgG1 format, for improved compatibility with existing reagents, assays and techniques.

Isotype and Format: Mouse IgG2a, Kappa

Clone Number: OX-6

Alternative Name(s) of Target: MHC Class II; MRC OX-6; CD74; MRC OX 6; Major Histocompatibility complex II

UniProt Accession Number of Target Protein:

Published Application(s): ICC, IP, RIA, WB, FC, IF, IHC

Published Species Reactivity: Rat, Mouse

Immunogen: This antibody was prepared by subcutaneously injecting non-polymorphic MHC class II (Ia-like glycoproteins) from the membranes of rat thymocytes into BALB/c mice.

Specificity: This antibody recognises a monomorphic determinant of the rat MHC II (I-A) antigen present on B lymphocytes, dendritic cells, some macrophages and certain epithelial cells. It also cross-reacts with mouse MHC, specifically I-A[k] and I-A[s]

Application Notes: This antibody binds to the rat MHC II (I-A) antigen, and cross-reacts with mouse I-A[k] and I-A[s]. Consequently, this antibody can be used to assess the tissue distribution of rat Ia antigens, indicating high Ia antigen expression on peripheral B lymphocytes, and significantly lower expression on thymocytes and T lymphocytes (McMaster, 1979).

Antibody First Published in: McMaster et al. Identification of Ia glycoproteins in rat thymus and purification from rat spleen. European Journal of Immunology. 1979, 9: 426-433 [PMID:315315](#)

Note on publication: Describes the original use of this antibody to identify and purify rat Ia glycoproteins, using indirect binding assays, FC and IP.

Product Form

Size: 1 mg Purified antibody in bulk size.

Purification: Protein A affinity purified

Supplied In: PBS only.

Storage Recommendation: Store at 4°C for up to 3 months. Note, this antibody is provided without added preservatives, it is therefore recommended this antibody be handled under sterile conditions. For longer

storage, aliquot and store at -20°C.

Concentration: 1 mg /ml.

Important note - This product is for research use only. It is not intended for use in therapeutic or diagnostic procedures for humans or animals.
