AXL (Human) Matched Antibody Pair

Catalog # : H00000558-AP51

規格 : [1 Set]

[List All](#)

Specification

Product Description: This antibody pair set comes with matched antibody pair to detect and quantify protein level of human AXL.

Reactivity: Human

Quality Control Testing: Standard curve using AXL 293T overexpression lysate (non-denatured) as an analyte.

Sandwich ELISA detection sensitivity ranging from approximately 27x to 3x dilution of the AXL 293T overexpression lysate (non-denatured).

Supplied Product: Antibody pair set content:
 1. Capture antibody: mouse monoclonal anti-AXL (100 ug)
 2. Detection antibody: rabbit purified polyclonal anti-AXL (50 ug)
 *Reagents are sufficient for at least 3-5 x 96 well plates using recommended protocols.

Storage Instruction: Store reagents of the antibody pair set at -20°C or lower. Please aliquot to avoid repeated freeze thaw cycle. Reagents should be returned to -20°C storage immediately after use.

Gene Information

Entrez GeneID: [558](#)

Gene Name: AXL

Gene Alias: JTK11,UFO

Gene Description: AXL receptor tyrosine kinase

Omim ID: [109135](#)

Gene Ontology: [Hyperlink](#)

Application Image

ELISA Pair (Transfected lysate)

Gene Summary: The protein encoded by this gene is a member of the receptor tyrosine kinase subfamily. Although it is similar to other receptor tyrosine kinases, this protein represents a unique structure of the extracellular region that juxtaposes IgL and FNIII repeats. It transduces signals from the extracellular matrix into the cytoplasm by binding growth factors like vitamin K-dependent protein growth-arrest-specific gene 6. It is involved in the stimulation of cell proliferation and can also mediate cell aggregation by homophilic binding. Alternatively spliced transcript variants encoding different isoforms have been identified. [provided by RefSeq]

Other Designations: AXL transforming sequence/gene, oncogene AXL
