ATP5G3 Pre-design Chimera RNAi

Catalog # : H00000518-R02

規格 : [10 nmol] [20 nmol]

List All

Specification

Product Description: Homo sapiens ATP synthase, H⁺ transporting, mitochondrial F0 complex, subunit c (subunit 9) isoform 3 (ATP5G3), nuclear gene encoding mitochondrial protein, transcript variant 3, mRNA.

Application Image

RNAi Knockdown

Reactivity: Human

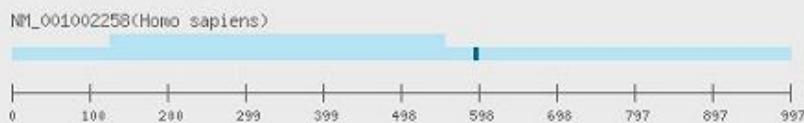

Supplied Product: DEPC water

Target Refseq: NM_001002258

Target Region: 3' Untranslated Region (3'UTR)

Storage Instruction: Store at -20°C, do not exceed 4 - 5 freeze-thaw cycles to ensure product integrity.

Note: Position of the Chimera RNAi.
The related RNAi products listed below were designed from different accession number but sharing the same RNAi sequence.

Applications

RNAi Knockdown

Gene Information

Entrez GeneID: 518

Gene Name: ATP5G3

Gene Alias: MGC125738,P3

Gene Description: ATP synthase, H⁺ transporting, mitochondrial F0 complex, subunit C3 (subunit 9)

Omim ID: 602736

Gene Ontology: [Hyperlink](#)

Gene Summary: This gene encodes a subunit of mitochondrial ATP synthase. Mitochondrial ATP synthase catalyzes ATP synthesis, utilizing an electrochemical gradient of protons across the inner membrane during oxidative phosphorylation. ATP synthase is composed of two linked multi-subunit complexes: the soluble catalytic core, F1, and the membrane-spanning component, Fo, comprising the proton channel. The catalytic portion of mitochondrial ATP synthase consists of 5 different subunits (alpha, beta, gamma, delta, and epsilon) assembled with a stoichiometry of 3 alpha, 3 beta, and a single representative of the other 3. The proton channel seems to have nine subunits (a, b, c, d, e, f, g, F6 and 8). This gene is one of three genes that encode subunit c of the proton channel. Each of the three genes have distinct mitochondrial import sequences but encode the identical mature protein. Alternatively spliced transcript variants encoding the same protein have been identified. [provided by RefSeq]

Other Designations: ATP synthase lipid-binding protein, mitochondrial,ATP synthase proteolipid P3,ATP synthase subunit 9,ATP synthase, H⁺ transporting, mitochondrial F0 complex, subunit C3,ATP synthase, mitochondrial, C subunit-3,ATPase protein 9,ATPase subunit C
