BCL2A1 Pre-design Chimera RNAi

Catalog # : H00000597-R01

規格 : [10 nmol] [20 nmol]

List All

Specification

Product Homo sapiens BCL2-related protein A1 (BCL2A1), mRNA.

Description:

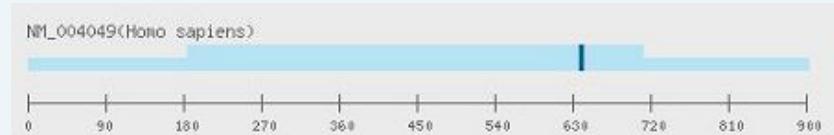

Reactivity: Human

Supplied Product: DEPC water

Target Refseq: NM_004049

Storage Instruction: Store at -20°C, do not exceed 4 - 5 freeze-thaw cycles to ensure product integrity.

Note: Position of the Chimera RNAi.

Applications

RNAi Knockdown

Gene Information

Entrez GeneID: [597](#)

Gene Name: BCL2A1

Gene Alias: ACC-1,ACC-2,BCL2L5,BFL1,GRS,HBPA1

Application Image

RNAi Knockdown

Gene BCL2-related protein A1

Description:

Omim ID: [601056](#)

Gene Ontology: [Hyperlink](#)

Gene Summary: This gene encodes a member of the BCL-2 protein family. The proteins of this family form hetero- or homodimers and act as anti- and pro-apoptotic regulators that are involved in a wide variety of cellular activities such as embryonic development, homeostasis and tumorigenesis. The protein encoded by this gene is able to reduce the release of pro-apoptotic cytochrome c from mitochondria and block caspase activation. This gene is a direct transcription target of NF-kappa B in response to inflammatory mediators, and is up-regulated by different extracellular signals, such as granulocyte-macrophage colony-stimulating factor (GM-CSF), CD40, phorbol ester and inflammatory cytokine TNF and IL-1, which suggests a cytoprotective function that is essential for lymphocyte activation as well as cell survival. Alternatively spliced transcript variants encoding different isoforms have been found for this gene. [provided by RefSeq]

Other Designations: hematopoietic BCL2-related protein A1
