Datasheet

BRCA1 (Human) Recombinant Protein (P01)

Catalog Number: H00000672-P01

Regulation Status: For research use only (RUO)

Product Description: Human BRCA1 full-length ORF (NP_009237.1, 1 a.a. - 59 a.a.) recombinant protein with GST-tag at N-terminal.

Sequence:
MDLSALRVEEVQNVINAMQKILECPICLELIKEPVSTKC DHIFCKVLLCCPSWSTVVRS

Host: Wheat Germ (in vitro)

Theoretical MW (kDa): 33.1

Applications: AP, Array, ELISA, WB-Re
(See our web site product page for detailed applications information)

Protocols: See our web site at http://www.abnova.com/support/protocols.asp or product page for detailed protocols

Preparation Method: *in vitro* wheat germ expression system

Purification: Glutathione Sepharose 4 Fast Flow

Storage Buffer: 50 mM Tris-HCl, 10 mM reduced Glutathione, pH=8.0 in the elution buffer.

Storage Instruction: Store at -80°C. Aliquot to avoid repeated freezing and thawing.

Entrez GeneID: 672

Gene Symbol: BRCA1

Gene Alias: BRCAI, BRCC1, IRIS, PSCP, RNF53

Gene Summary: This gene encodes a nuclear phosphoprotein that plays a role in maintaining genomic stability, and it also acts as a tumor suppressor. The encoded protein combines with other tumor suppressors, DNA damage sensors, and signal transducers to form a large multi-subunit protein complex known as the BRCA1-associated genome surveillance complex (BASC). This gene product associates with RNA polymerase II, and through the C-terminal domain, also interacts with histone deacetylase complexes. This protein thus plays a role in transcription, DNA repair of double-stranded breaks, and recombination. Mutations in this gene are responsible for approximately 40% of inherited breast cancers and more than 80% of inherited breast and ovarian cancers. Alternative splicing plays a role in modulating the subcellular localization and physiological function of this gene. Many alternatively spliced transcript variants, some of which are disease-associated mutations, have been described for this gene, but the full-length natures of only some of these variants has been described. A related pseudogene, which is also located on chromosome 17, has been identified. [provided by RefSeq]
